He has two different sizes of beautiful Music type, which will enable him to execute any jobs in this line, and bands or choirs can be furnished with duplicate copies of any piece of music on very short notice. He has also four different sizes of Script Type, and two sizes of a new and beautiful style of type called Secretary, suitable for law blanks of every description.

A great variety of Blanks, handsomely printed and on good paper, constantly on hand, and for sale, either wholesale or retail, on the most reasonable terms.

The above establishment embraces a greater variety of the most fashionable printing materials than any similar establishment in the western part of the state, and no expense has been spared in fitting it up; liberal patronage is confidently expected.

To Printers.—R. Oliphant, having been appointed agent for the sale of Type, Presses, &c., will furnish any orders that may be entrusted to his care on the shortest notice. Type from any foundry in New-York and the different patent presses can here be obtained at New-York prices, without transportation.

Inquiries from the different foundries can be prepaid at this office, and printers can be supplied with any article wanted, without subjecting themselves to the expense of going to the metropolis for the selection.

WOOD TYPE.—PRICES REDUCED.

Type Founders and Printers are also hereby informed that the Subscriber will take especial care to furnish himself of any fall that may be made in prices by other manufacturers, so as always to supply them on BETTER TERMS than any other manufacturer. George F. Nesbitt, Bonting Building, corner of Wall and Water-streets, New-York, informs the Printers of the United States, that he has now in full operation, a Machine for cutting Wood Types, which being an entire new invention, is warranted to cut Types both plain and ornamental, far superior to any heretofore made to the public, and in proof of which he would respectfully state he has obtained for their superiority both Medals and Diplomas from the American and Mechanics' Institutes of the city of New-York, at the Fairs held in 1837, 1838, and 1839, as the books of the Institutes show.

George F. Nesbitt respectfully invites the attention of Printers to the fact, that through the politeness of the proprietors of the Liverpool and Havre Lines of Packets, he has been favored with the latest English and French specimens,—that many of the new styles in them are very handsome, and have been got up by him; they were exhibited at the Mechanics' Fair in this city, the Mechanics' Fair in Boston, and the American Fair in this city, all now just closed, and pronounced by the Committee of Printers appointed to examine Types and Specimens, to be superior to any Wood Types ever before exhibited, and having a decided advantage over large metal type.

George F. Nesbitt would also inform the Printers of the United States, that he is ready to cut Types on the following terms, viz: 5 lines Pica, upwards, from any of the patterns of small Job Type contained in his extensive specimen of Messrs. G. Bruce & Co., or any new pattern that can be suggested.

George F. Nesbitt cautions that Printers should be careful with the tags, that his prices are much reduced from those heretofore charged by other manufacturers, and that his terms are Six Months credit, or five per cent. discount for cash.

GEORGE F. NESBITT,
Bonting Building, corner Wall and Water-streets, New-York.

WOOD TYPE REDUCED.—D. Wells & Co., No. 38 Ann street, N. Y. inform the Printers of the United States, that by the aid of their machine Type Cutter, they are enabled to furnish wood type of superior quality to any previously manufactured and to sell them from 25 to 50 per cent less than former prices. Their specimens also exhibit a greater variety of plain and ornamental JOB TYPE, than any heretofore published in this or any other country, and will be furnished to customers on application. They first introduced the Wood Type into this country in 1827, and now have the gratification of seeing it used throughout the union—giving universal satisfaction. They being cut upon the end of the wood, are more durable than Metal Type, and are more convenient to use, less liable to injury, and cost much less.

D. W. & Co. particularly invite a comparison of their type with that recently introduced into this city by Mr. Nesbitt, the agent of the manufacturer; who modestly assumes that his are the only ones manufactured by machinery, and are therefore superior to any others. It is only since any of us to say that their machine was invented by us, and was cut by the same person we employed upon our type for years since; and any practical pressman knows that the specimen book published by him is an attempted imitation of ours from beginning to end.

CAUTION.—Printers who order from Type Founders, should be particular to direct that to procure their Wood Letter from D. Wells & Co. who guarantee all type manufactured by them to be perfect in every particular, or may be returned; and from the following list of prices, Printers will see that they are generally at least 25 per cent. less than those furnished by any other establishment; and that Nesbitt's extended letter is nearly 30 per cent. more than theirs.

Agents.—The following agents for our establishment are kept constantly supplied with an assortment of Wood Type commonly used, and through whom all orders will be supplied.

Messrs Johnson & Smith, and Robb & Eckler, Philadelphia; A. Jayne, Pittsburgh; Charles Carter, Baltimore; Morgan Bates, Detroit; N. Guilford, Cincinnati; D. Hobbs, Louisville; Lawrence & Hill, New Orleans; Richard Oliphant, Oswego.

Terms—6 months credit, or 7 per cent. off for cash.

Fonts cut after any design, by sending a pattern letter.

Printers publishing the above four times within six months from this time, and sending a copy of their paper to us, will be entitled to $3 in type, provided they purchase to the amount of $10.
