The examination of the officers and crew of the Portuguese ship *Mariana Flora* terminated yesterday. They were discharged upon the ground that there existed no proof of their having attacked the Aligator with a piratical intention; and that they acted under a mistake, in supposing the Aligator to have been a Patriot privateer, and fired upon her with a view of frightening her off.

The ship we understand will be libelled in behalf of the United States, as a prize to the Aligator.—*Pal. Boston.*

OVAL SHAPED HATS.

THE subscriber would inform the public, that he continues to manufacture the real Oval Shaped Hats in his usual superior style, and which have heretofore given such general satisfaction. Having seen a recent publication in which the advertiser would endeavour to make the public believe, that those Hats not purchased of him are not genuine, but forced into an artificial shape by means of a screw—it is but just to remark, that this is but one of a number of instances in which a certain individual has endeavoured to injure (though with "seeming regret") the well earned reputation of his fellow traders. The public will please call and examine for themselves, and they will then be enabled to judge for themselves, if his Hats are not the real Oval. The blocks on which they are finished can be seen at any time, by calling at his Store, 199 Chatham-Square. ORLANDO FISH.

☞ He has also on hand, a general assortment of Hats of every description, at wholesale and retail. dec 29—3t

LECTURES ON

GEOGRAPHY.

A COURSE of Lectures or Lessons will commence during the first week in January on the Geography of the World Generally, and of the United States in particular, at the room adjoining the Writing Academy in Greenwich-street, one door from Vesey-street.

Ladies will attend every day, or every other day, (as to them most convenient,) from 10 o'clock A.M till 12, and Gentlemen from 2 to 4 P. M. A course consists of 10 Lectures, each 2 hours.

Price 2 Dollars, given at entrance. Twenty-five only, will be admitted into a class.

A Geographical acquaintance with the world in which we live, is an attainment desired by all who make any pretensions to education. Without a knowledge of Geography, neither sacred nor profane History, "nor even a common Newspaper" can be understood. This branch of education enlarges the mind and extends its views beyond the narrow limits of local and mean political prejudice. It opens to the mind a wide range through the world, and according to a well known remark of a British Statesman, "is an Earthly subject, but a Heavenly study."

It is hoped that the plan proposed in these Lectures will be found an improvement on all methods for teaching Geography, that have heretofore been made known to the public. Instead of learners wasting time in reading over pages or volumes of mere words, concerning different countries, I shall exhibit those countries themselves, drawn on a larger scale than has probably been seen before. Oceans, continents, empires, kingdoms and states will be displayed to the eye on large, bold-featured Maps, as a wide extended landscape from a lofty elevation. By this method the mind comprehends them without an effort; they make a pleasing and lasting impression on the memory. After the eye has thus made a wide range over the globe, in taking a general and tolerably correct view of it; the particular geography of seas, coasts and countries—with their rivers, cities and towns, (especially the U. States) will be taught by Voyages and Tours.

The Syllabus, containing the particular heads and divisions of the course of Lectures will be made known as above, where Ladies and Gentlemen are respectfully invited to call. A number have already engaged.

At a very early period of life, my attention was turned to Geographical subjects, which was a favourite study in College. After leaving which I instructed Geography some time in connexion with writing. As a teacher of the latter branch I have for nearly 10 years been travelling and occasionally residing in the different states, cities and towns, from Maine to Georgia, inclusive; and also in the interior, both east and west of the Allegany Mountains.

I have taken notes of the face of the country, soil, climate, laws, literature, manners, customs, &c.—Having made these preparations, one part of my time will again be devoted to Geography, and the other to Writing. D. HEWETT.

P. S. The Writing Department will still be strictly attended to, during certain hours of the day.—These lessons in Writing ever have been, still are, and to a moral certainty ever will be attended by large and respectable numbers, so long as a handsome accomplishment, united with economy of time, shall have any influence on society. On account of the liberal encouragement here, I have determined, for the first time in seven years, to spend at least part of the winter thus far north of my congenial latitude. The last day of January will bring both my Chirographical as well as Geographical lectures to a positive conclusion here. dec 29—4t*
