29 VISIT TO WATERTOWN

Tuesday, Wednesday and Thursday.

AUGUST 4, 5 AND 6.

AT THE

OTIS HOUSE,

Parlors Nos. 5 and 6.

CONSULTATION FREE!

Mrs. R. L. Smith, M. D.,

Will be at her SYRACUSE office, No. 223 W. Fayette street, EVERY SATURDAY.

Dr. Smith can tell your disease without asking any questions, or having any previous knowledge of your complaint. The doctor is a graduate of both the old and new school of medicine, with a practice of over 25 years, and will guarantee a cure in catarrh, Bronchitis, Incipient Consumption, Dyspepsia, Rheumatism, Diabetes and all chronic diseases of men, women and children.

Dr. Smith Has discovered a sure cure for all ulcerations of the mucous membrane, wherever located, and ladies who are suffering with complaints peculiar to their sex can be sure of a speedy relief and a "Permanent" Cure. Patients given up by other physicians are invited to call for a free consultation and advice. The Doctor treats all chronic diseases of whatever name and nature, and will perform all necessary operations in general surgery when desired.

Tumors Removed by a New Process.

No Surgical Operation or Use of Electricity

Fibroid and other uterine tumors removed by a process discovered by Mrs. Smith.

Testimonials of cures furnished at her different offices, or sent by mail from her Syracuse office and laboratory, No. 223 West Fayette street. Address with stamp.

Forty-second Visit to Rome—At Stanwix Hall, July 28th.

Twenty-eighth Visit to Utica, at Butterfield House, July 29, 30 and 31.

FINANCIAL.

WALL STREET. OPTIONS $10 to $1,000. MANUAL explaining best methods, FREE. Margin operations conducted on $10—upwards. E. S. PECK & CO., 45 Broadway, N. Y.

Third School Commissioner District Caucus.

The republican electors of the third school commissioner district of Jefferson county are requested to select delegates at their town caucuses, called for the 10th inst., to meet in convention at Wood's hall in the village of Dexter, Jefferson county, N. Y., on Monday, Aug. 17, 1896, at 2 o'clock sharp, for the purpose of nominating a candidate for school commissioner for the third school commissioner district of Jefferson county, N. Y., and transacting such other business as may properly come before said convention.

JAMES A. GILMORE,
E. T. COLLINS,
Com. Third School Commissioner Dist.

NEW YORK STATE CROPS

General Conditions Continue Favorable

Oats and Barley Being Harvested and a Good Yield Reported—Corn and Late Potatoes Growing Finely —Apple Trees Loaded With Fruit.

CORNELL UNIVERSITY, ITHACA, N. Y., Aug. 4, 1896.

The following information is condensed from the reports of crop correspondents for the week ending Saturday, Aug. 1, 1896:

Broome Co.—Oats harvest delayed by the wet weather; a heavy crop expected.

Cattaraugus Co.—The heat has caused oats to rust; and potatoes also seem to be affected. Army worms nearly gone. Oats being cut, many fields badly injured by army worms. In some fields 15 pupae of the worms were found in digging over less than a foot of soil. Some haying yet to be done. Pastures excellent. Potatoes rotting some.

Cayuga Co.—Wheat yielding well for the straw. Barley harvest well under way; straw above the average. Corn and potatoes very promising.

Chautauqua Co.—Corn making rapid growth; early planted in silk. Apple trees breaking with their load of excellent fruit.

Duchess Co.—Oats very heavy; rye and wheat all gathered. Corn very promising; apples plentiful and cheap; potatoes extra fine; garden produce abundant and of excellent quality. Late pears and plums only half a crop. Quinces scarce. Hops setting heavily; grapes never better. Rose bugs have appeared on grapes in great numbers. Dairy interests very fine.

Franklin Co.—Very favorable for all growing crops, especially for corn and potatoes. Wheat and oat harvest commenced. Aftergrowth of meadows coming finely. Hops coming out of burr and doing remarkably well for the care they have had.

Jefferson Co.—Grass begins to grow for the first time this season. Corn never looked better, all crops growing very well. Army worm has generally disappeared.

Lewis Co.—Too many grasshoppers to permit much improvement in pastures. Gardens are also being damaged to some extent. Oats harvest general, with a fair crop; some pieces struck with rust. Barley better than last year. Early potatoes are small; late ones very promising.

Livingston Co.—Corn, beans and potatoes never more promising. Plenty of rain for pastures and fall plowing. Sweet corn harvest will begin next week. A large oats crop being harvested, although there is some rust. Spring grass seeding is poor; pastures and clover fields starting nicely.

Niagara Co.—Ground thoroughly soaked. Beans have sustained considerable damage from the rains, especially on low grounds. Pastures starting nicely. Uncut oats badly lodged by rains of 29th. Pear orchards badly affected with blight. Some millet sowed the past week. Farmers plowing for wheat. Apples looking well.

Oneida Co.—A good crop of oats being harvested. Heavy rains of 29th completely relieved the drouth. Early potatoes very poor. There will be a few apples, but no pears. Army worms decreasing. Potatoes dying fast and are a good crop. Cows are shrinking.

Onondaga Co.—Pastures and meadows making fine growth. Late potatoes good; threshing commenced.

Ontario Co.—Beans are not full of pods. Many neglected apple trees broken by the heavy fruit. Some will sow grass seeding again as new seeding is spotted. Oats badly lodged; some streaked with rust; most fields ripen unevenly. Plowing for wheat fairly begun.

Orleans Co.—Beans were injured more by the heavy rains of last week than at first appeared. Much barley still in the fields along the lake shore, and it is badly damaged. Apples are very fine.

Oswego Co.—Fine rains, and grass growing nicely. Oats harvest began with a good straw and a fair prospect for good grain. Some complaint of potatoes rotting. Pastures are poor, and cows shrinking in milk. Corn growing fast. Winter grain yields less than expected. More blackberries and huckleberries than ever before known.

Rensselaer Co.—Oats being cut; many fields nearly an average crop. Early potatoes yield better than was expected. Apples are a light crop. Vegetation generally improving.

Steuben Co.—Haying generally finished; much hay damaged by rains of past week. Oats harvest begun; a large crop. Some oats are rusted, and yield will be less than last year on account of smut. Haying progresses under unfavorable conditions. Some potato blight. Late crops getting a large growth.

St. Lawrence Co.—Occasional showers; not moisture sufficient to affect pastures and produce aftergrowth. Barley being harvested; good yield. Oats fine. Wheat fair. Grain of all kinds is made a fine growth. Potatoes few in the hill and not large.

Washington Co.—Haying nearly completed. Unfavorable for oats harvest; the crop is far beyond the average. Potatoes, corn and buckwheat looking very promising. Pastures and meadows looking nice and green. Quite a sprinkling of army worms through the county. Potato bugs less numerous than usual.

Westchester Co.—Haying finished and oats harvest begun. Early mowed meadows now look very fine, and spring seeding is fair to good. Apples hold well and are very promising.

GENERAL REMARKS.

Corn, late potatoes, beans, hops, tobacco and garden produce have seldom been in finer condition. Apples, grapes and late berries also are very promising. Farmers are in the midst of oats and barley harvests, and some have begun with fall plowing. Wheat and rye are mostly cut, and many are threshing. Much standing oats were badly lodged by the heavy showers of the 29th and 30th; and considerable oats, barley, wheat and rye in shock were badly damaged. High winds with the storms did much damage to some apple orchards; many limbs being broken from the weight of the fruit and the force of the wind. In many localities haying is not yet finished, being delayed by the rains; and many fields of grain on low ground are overripe, it being too wet to reap. Beans have not very heavy, but were considerably damaged by the rains, especially on low grounds. In many central localities early potatoes are small and few in the hill, but throughout the state late potatoes are most promising. There is some rot reported, however, from several localities. The moist weather also has caused some rust in oats, but the crop as a whole continues excellent.

The warm showers have given pastures and after growth on meadows a fine start, and new grass se ding and buckwheat are coming forward rapidly.

Corn is tasseling and the condition of the crop is very promising. Tobacco continues to improve, and is in a flourishing state; hops are nearly out of the burr, and are fruiting finely. Grapes continue very promising. In some localities pear trees are well filled but the fruit badly blighted usually, especially in parts of Niagara county. Early apples are of fine quality and abundant.

The following is extracted from the national bulletin for the week ending July 27:

Although corn has suffered to some extent from heavy rains in the states of the Ohio and central Mississippi valleys and from drought in southwestern Missouri, Arkansas, Louisiana and Texas, the general outlook for an exceptionally fine crop continues promising. In Kansas much of the crop is now made, and in Nebraska it is in unusually fine condition. Indiana reports "a great crop almost assured."

Spring wheat has experienced favorable weather conditions in Minnesota and South Dakota and the early sown has somewhat improved in North Dakota, but in that state late sown did not head and is being plowed up. Spring wheat harvest has begun in South Dakota, and will begin in Minnesota about Aug. 1.

NATURAL FAT

Getting Fat Is Only a Question of Eating Proper Food.

Thin people who want to get fat should eat proper food and digest it.

That is the only natural way.

The trouble with most thin people is that they suffer from indigestion.

They don't digest their food. They don't get enough nourishment. They are slowly being starved. They are poisoned by the products of fermented and putrid food.

Shaker Digestive Cordial, a gentle, natural, vegetable digestive, attacks the food in your stomach just like the digestive juices, and turns it into healthful nourishment. It helps your stomach naturally. It makes thin dyspeptics fat. It makes poisonous blood pure. It tones up and cures the stomach.

Nothing will cure indigestion like Shaker Digestive Cordial, because nothing else goes so naturally about it.

This is why it has been so successful in relieving nausea, vomiting, dizziness, weakness, bad taste, fever, flatulence, constipation, loss of appetite, headache, neuralgia, rheumatism, etc., by curing the disorder which causes the symptoms.

A ten doses will prove its value, but you won't get fat on one bottle.

All druggists. Ten cents for a trial bottle.

Write for book on Food and Fat to The Shakers, 30 Reade street, New York.

Adams Live Stock Market.

Adams, Aug. 4.—A special shipment of live stock was made from these yards yesterday, consisting of 40 calves at 5 cents per pound, 84 lambs at $2.50 each, 10 hogs at $3 per cwt.

Giving Advice to the Farmers.

The following from the Boston Transcript will be received with an appreciative smile by the farmer:

Between noxious weeds and noxious insects the farmer truly has a hard time of it, and it seems that the least they could do who depend upon his efforts, but do not share his particular anxiety, would be to extend their sympathy. But they give him very little even of that. They offer him advice and bestow criticism upon him, instead. He is told that if he was not so ignorant and so conservative, clinging to the methods of the past and refusing to avail himself of the revelations of science and the results of wider experience than his, he would escape many of the afflictions that now make a slave of him and bring his toil to naught. It is a very common indulgence among people of all classes to imagine how much better they could conduct the business of some one else, especially when that some one else is unsuccessful, than he is conducting it himself. Thus the farmer is informed by those who live in cities and study agriculture as an abstract science that "he is wasteful with his refuse that could be turned to account as fertiliser;" that "he does not succeed as he thinks he should because he does not make his brain serve and save his hand," and much more wisdom to the same purpose. The only wonder is that these critical theorists, if they have full faith in their own views, do not all turn farmers. Certainly there is no other Utopian pursuit, as they represent this to be under the conditions which they describe, that can be entered upon at so small a cost. Farms are very cheap and one can choose his location almost at pleasure. Why not drive out the ignorance and prejudice that fail, and let brains and education do their perfect work? Farming has been brought to a pretty low state, it is true, and farmers are not as enterprising or advanced in their ideas as they might be, but it will require something more vitalizing than cuffs and criticism to bring about the elevation of this important industry.

Lowville Grange.

Aug. 3.—Lowville grange was held on Saturday afternoon. Brother George A. Sanders read a paper on "The 20th Century. Will the Farmer be in It?" The paper compared the past with the present, and was a gloomy prospect for the farmers unless they did more thinking and acting for themselves and not let the politician and lawyer do it all for them. There was a short discussion on the paper by several members.

The hay crop in this town is very uneven. The river flats are as a general thing poor; the west and south parts have suffered for rain during the growing season and from the grasshoppers. The north is better than the other parts. The yield is more than last year's throughout the town. Grain will be a good crop with a very large crop of corn still growing.

Shake Into Your Shoes

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for sweating, callous and hot, tired, aching feet. Try it today. Sold by all druggists and shoe stores, 25c. Sent by mail for 25c in stamps. Trial package free. Address, Allen S. Olmstead, Le Roy, N. Y.

NEW YORK PRODUCE MARKET REVIEW.

This morning's New York Commercial Bulletin gives the following review of yesterday's produce market.

Butter.

Tuesday Evening, Aug. 4.

Arrivals continue quite liberal, and, while a fair trade is passing, there is no change in the general line of values. Strictly fancy fresh creamery is commanding 15c quite generally, and has rather a firm tone at that. Some holders seem to be a little short of their requirements, but others are fairly supplied, and on the whole there seems to be enough stock to meet all wants. Western advices have come a little firmer, but unless trade here shows further expansion there is not likely to be any improvement in prices. Speculative buyers are showing less interest this week, and, while exporters are very busy, most of their operations are confined to forwarding stock bought a week or two ago. Not much new business is being accomplished. Present indications point to about 9,000 tubs to go out on the London and Liverpool steamers tomorrow, and the freight room for all of the Saturday boats has been engaged. Qualities are criticised quite closely, and unless the butter is really fancy, it has to be shaded in price; now and then a lot closely approximating extra going at 14½c., but general sales are in range of 13@14c. Very small supplies of state dairy butter offering, and not much inquiry for them.

Cheese.

The market was only moderately active today, only two or three exporters showing much interest, and they rarely disposed to pay above 7c for fancy large full cream cheese, and some business was reported at that figure. The higher figures paid at Utica yesterday, however, inclined most holders to feel firm and confident, and some refused to offer finest cheese below 7¼c, and, while it was a strain to reach that figure, still it was obtained in some instances for sufficient quantity to warrant the quotation. Under priced full cream cheese has little call unless prices are put right down to about 6¾c for slightly faulty lots. Small size full cream appear to have a little more call from the home trade, but mostly for small lots, and, with a large surplus here, holders are anxious sellers and feeling is unsettled, with 7c rarely possible to exceed for colored, and difficult to reach for white.

New York Produce Market.

NEW YORK, Aug. 5.—12 m.

Mothersell's Sure Corn Cure

[illegible] cure the worst corn. Sold on a [illegible]rantee or money refunded.

[illegible] Nerve Plasters for Rheumatism.

Montreal Cheese Market.

Of Monday's cheese market at Montreal the Gazette says:

The cheese market seems to be started on another advance, if the transactions in the country Saturday and the buying at the wharf today are any criterion. On the other hand, the statement was made quite as frequently today as last week that there was no encouragement in the legitimate demand. Based on the prices paid Saturday and today, the market is a 7c to 7¼c one at the very outside, but whether such prices can be made over the cable in a regular way or not is another matter. The sales at the wharf this morning comprised 5,000 boxes, the ruling price being 7c.
