Where the money came from was never clear, but Brooks said some of it was invested by Maureen Daugherty, 24, daughter of a prominent area physician, who joined the family in Eugene.

The caves had a series of tunnels that went about 150 feet into the hillside. The tunnels were about 10 feet wide, 10 feet high. The caves were dug underground, and were used as storage for food, tools, and other supplies.

In June 1974, the family was back in the Lorraine area living in a cattle-herding cave along a Namenie road. The caves were a series of tunnels that went about 150 feet into the hillside. The tunnels were about 10 feet wide, 10 feet high. The caves were used as storage for food, tools, and other supplies.
