ALBANY NOTES.

Assemblyman Boshart introduced two bills that are in line with the other pure food laws that are being enacted at Washington and by the state legislature. These bills will not only be of material interest to the dairy farmer, but they furnish a guarantee to cities and towns that the purchasers of milk products receive what they buy and are willing to pay for. One bill prohibits the sale of milk as certified, unless examined by a medical association or its duly designated representatives, and where there is no such medical examiner, then by the board of health of said city, town or village, and where sold to bear the inspector's mark of the medical association or persons authorized to prefix the same.

Imposters are taking advantage of the term "certified milk" by selling to invalids and sick infants ordinary milk, which is less expensive to produce, under the name, "Certified Milk." The person is willing to pay for "certified milk" they are desirous of knowing that they receive what they are willing to pay for. To prevent the deception in the sale of such milk to innocent purchasers is the purpose and aim of this measure.

Another section of the same bill amends the present law by providing that when a can of milk has been delivered on the platform for shipment or sale, each can so delivered must be labeled with the contents of the can when other than pure milk. That is, when a can is delivered for shipment, it is presumed evidence of sale. The men who operate milk shipping stations will be required to ship milk in as pure a form as the farmers are required to deliver their product. Skimming will be more easily detected and the prosecution for the same facilitated. Adulteration by adding a few quarts of skimmed milk to each can of whole milk will be lessened and the dealer will be compelled to ship the milk in the same pure and unadulterated form in which it is received from the producer.

The second bill amends the agricultural law by defining adulterated milk-cream, as cream containing not less than 18 per cent. of milk fat or cream, to which no substance whatever has been added. At present there is no law in New York defining the per cent. of milk fat that should be sold as cream.

We have a state law that makes it unlawful to sell milk containing less than 3 per cent. milk fat. As a proper safeguard to people who buy cream, there is no reasonable excuse why customers do not have sound conception of what that cream means. When one sees a can of forty or fifty cents per quart for cream, there is sound reason that we should have some conception of the amount of milk fat in that quart of cream.

TO VOTE ON SMOOT.

Both Sides Claim a Majority of the Senate.

WASHINGTON, Jan. 29.—Senator Reed Smoot, of Utah, expects that an agreement will be reached for his re-election to the Senate on Feb. 15. But there is so much mystery surrounding the case that it is suggested in some quarters that there may not be a vote at all. Senator Burrows, of Michigan, chairman of the Committee on Privileges and Elections, has not yet indicated for or against a vote on the resolution reported from his committee declaring Senator Smoot's seat vacant. This delay has given Mr. Dubois, of Idaho, some uneasiness, for he realizes that the session is drawing rapidly to a close and appropriation bills are other important matters will press for the legislative right of way.

A Green Senator has expressed a desire to speak on the Smoot case before a vote is taken. There are many others who secretly believe the Utah Senator should not be re-elected, but do not care to invite the wrath of the million or more women protestants who have memorialized Congress in favor of ousting Mr. Smoot.

Senator Burrows said before leaving for Detroit to attend the funeral of the late Senator Alger that he would not speak as soon as he returns that day be fixed for a vote. Each side claims a majority of the votes, but the expressions of Senators indicate a majority in favor of Senator Smoot.

KINGSTON NEEDS FUNDS.

Imperial Grant Hoped For—Governor's Designation.

KINGSTON, Jamaica, Jan. 29.—It is understood that Governor Sweetman tendered his resignation as Governor of the Colonies, a few days ago, in consequence of the Admiral Dago incident, and his inability to solve the problem created by the earthquake. On Saturday the Governor visited the temporary office of the Municipal Council and informed the vice-chairman who is acting in the absence of Mayor Talk, who is injured, that the government had decided to relieve the people of Kingston from all rates and taxes for a period of fifteen months, beginning January 1st.

The "mass movement" has been received with pleasure by the residents of the city, who will be encouraged to start the work of rebuilding as early as possible.

Archbishop Nuttall, in an interview, said that the Municipal Council was unable to deal with the present extraordinary emergency, and should be replaced, and that no commissioner with full powers should be appointed to govern the city during the period of reconstruction. He also said that, in addition to the generous contributions from the United States, Canada and elsewhere, it is absolutely necessary to obtain an imperial grant and a large imperial loan to rebuild Kingston, more particularly in view of the attitude of the English fire insurance companies, which have refused liabilities for losses sustained during the earthquake and fire.

NATURE'S CATARRH CURE.

Sensible and Scientific Way to Cure This Desirable Disease.

In no other way can catarrh be cured as naturally and quickly as by the use of Hyonol, which reaches the seat of the trouble that comes with every outburst. In this way all the air that enters the nasal passages, the throat or the lungs, is filled with Hyonol's healing medication, reaching the most remote air cells of the respiratory organs, and soothing and healing the irritated mucous membranes.

So strong is F. C. Snyder's faith in the power of Hyonol to cure catarrhal troubles that with every dollar outfit he sells he gives a guarantee to refund the money unless it cures.

The prizes were Bibles for those who needed them and other books for those who were supplied with a Bible. At the close of 1906, Mr. Spicer gave to each member of the school, who desired it, a small blank book, in which to keep a record of the texts for each Sunday in the year. At the close of the year 1906 he asked for those which were filled and 25 were returned to him and each received a copy of "The Song of Songs." The pastor gave a short but very interesting sermon to the school.

NATURE'S CATARRH CURE.

Sensible and Scientific Way to Cure This Desirable Disease.

In no other way can catarrh be cured as naturally and quickly as by the use of Hyonol, which reaches the seat of the trouble that comes with every outburst. In this way all the air that enters the nasal passages, the throat or the lungs, is filled with Hyonol's healing medication, reaching the most remote air cells of the respiratory organs, and soothing and healing the irritated mucous membranes.

So strong is F. C. Snyder's faith in the power of Hyonol to cure catarrhal troubles that with every dollar outfit he sells he gives a guarantee to refund the money unless it cures.
