

### New Type Radio O. K., Says Capper

Senator Arthur Capper believes that the development of the new air cell radio receiver offers the final solution to the farmer's radio problems.

"I had great interest among rural people in the new type air cell receiver for farm use," says the Senator. "It seems to offer the final solution to satisfactory reception on farms not served by power lines."

"This new type of air cell receiver seems to compare favorably with the latest developments in electric sets in both quality of reception and trouble-free service. I believe they will result in a rapid growth of the American radio audience and in a much wider use of radio among farmers."

The principal advantages of air cell receivers over previous types of battery sets, in addition to tone quality comparable to modern electric radio receivers, is the elimination of storage batteries and the expense and trouble of frequent recharging which they entailed.

Using a revolutionary type of "breathing battery" for "A" current, the new sets are said to give the rural dweller the same type of radio service previously enjoyed only by persons in cities where electric current is available.

Although developed a little more than a year ago, the new type sets for farm use are today being made by all leading radio manufacturers.

cause they lived by the viks or bays of their country.

—One of the best methods of feeding wild birds in winter is to serve corn on the cob.

—An orange-colored dye, for use in tinting silk and wool, was obtained from castor oil in recent experiments in India.

—Chickens kept in damp, overheated poultry houses in winter catch colds and droop just as human beings do for want of proper ventilation.

—The average oil well in the United States produces about 3,000 barrels of oil a year which is 600 times as much as a whale yields in its lifetime.

—In Chile if a woman's husband is habitually drunk, she can collect half his pay, if any.

The cook books tells how, but the bank book tells how much.

Evidence that the auto is trying to replace the horse comes out every time a fellow cranks one of the things that flares back with a kick, breaking his arm.

Some children who are born with a silver spoon in their mouth, never do much stirring when they grow up.

Hound dogs sit around and howl at the moon, while calamity howlers generally sit around and howl at nothing.

One thing about election—to the victors belong the responsibilities.

The trouble with living in a big house would be to think of the many rooms you would have to search in looking for your pipe.

Many a person has found that the law helps those who help themselves.

A radio is like most people. They usually work better in the winter time.

Airplans may be a late invention, but grandfather can tell you that there were plenty of high fliers in his time.

American women use ten thousand tons of talcum powder each year. So far statistics haven't revealed how much gun powder they use also.

Think and Grin—  
Could you believe that some women really have stomachs, because if you should ask them how they are they will give you a lot of "inside information".

"Mary has a wonderful husband."  
"Yes? Houzat?"

"Why, he helps her do all the work. Monday he washes the dishes with her. Tuesday he dusted with her. And tomorrow he is going to mop the floor with her."

### REAL ESTATE FOR SALE

### HEALTH HINTS James J. Corbett FOR By Former Heavyweight Champion AMATEUR ATHLETES of the World

These articles have been prepared by Mr. Corbett in cooperation with the staff of the Department of Health of the City of New York and are being released for the free use of newspapers throughout the country in the interest of the health of boys and girls.

#### 7. THE IMPORTANCE OF SLEEP

Professional athletes while training are compelled by their trainers to be in bed early every night. They know that sleep is essential to strength and stamina.

So if you would fit yourself for any sport or game you must get at least eight full hours sleep every night. The boy or girl who keeps late hours and generally disregards the importance of sleep never can excel in any sport.

You should sleep in a room with the windows wide open, winter and summer, if you want to be healthy and strong. Do not fear taking cold; have sufficient bed clothes and there will be no danger.

Do all your reading before you go to bed. When you have retired compose yourself and sleep soundly for eight full hours.

#### Did You Know That—

- Great Britain is the leading country in the use of motorcycles.
- The rat population of the United States and continental Europe equals the human population.
- A survey of Indian children in forty counties of Oklahoma showed that nine out of ten of the children were in school.
- The largest kind of bird's egg ever known was laid by a great extinct bird called the Aepyornis, which lived in Madagascar.
- Government geologists say that, contrary to popular opinion, water levels in well are seldom stationary, but move slowly up and down.
- The naval orange was introduced into California from Brazil in 1873.
- The Colorado river is still digging out great canyons in the southwest.
- The Vikings were so called because they lived by the viks or bays of their country.

### Elevators Whisk Tourists 750 Feet Through Ground

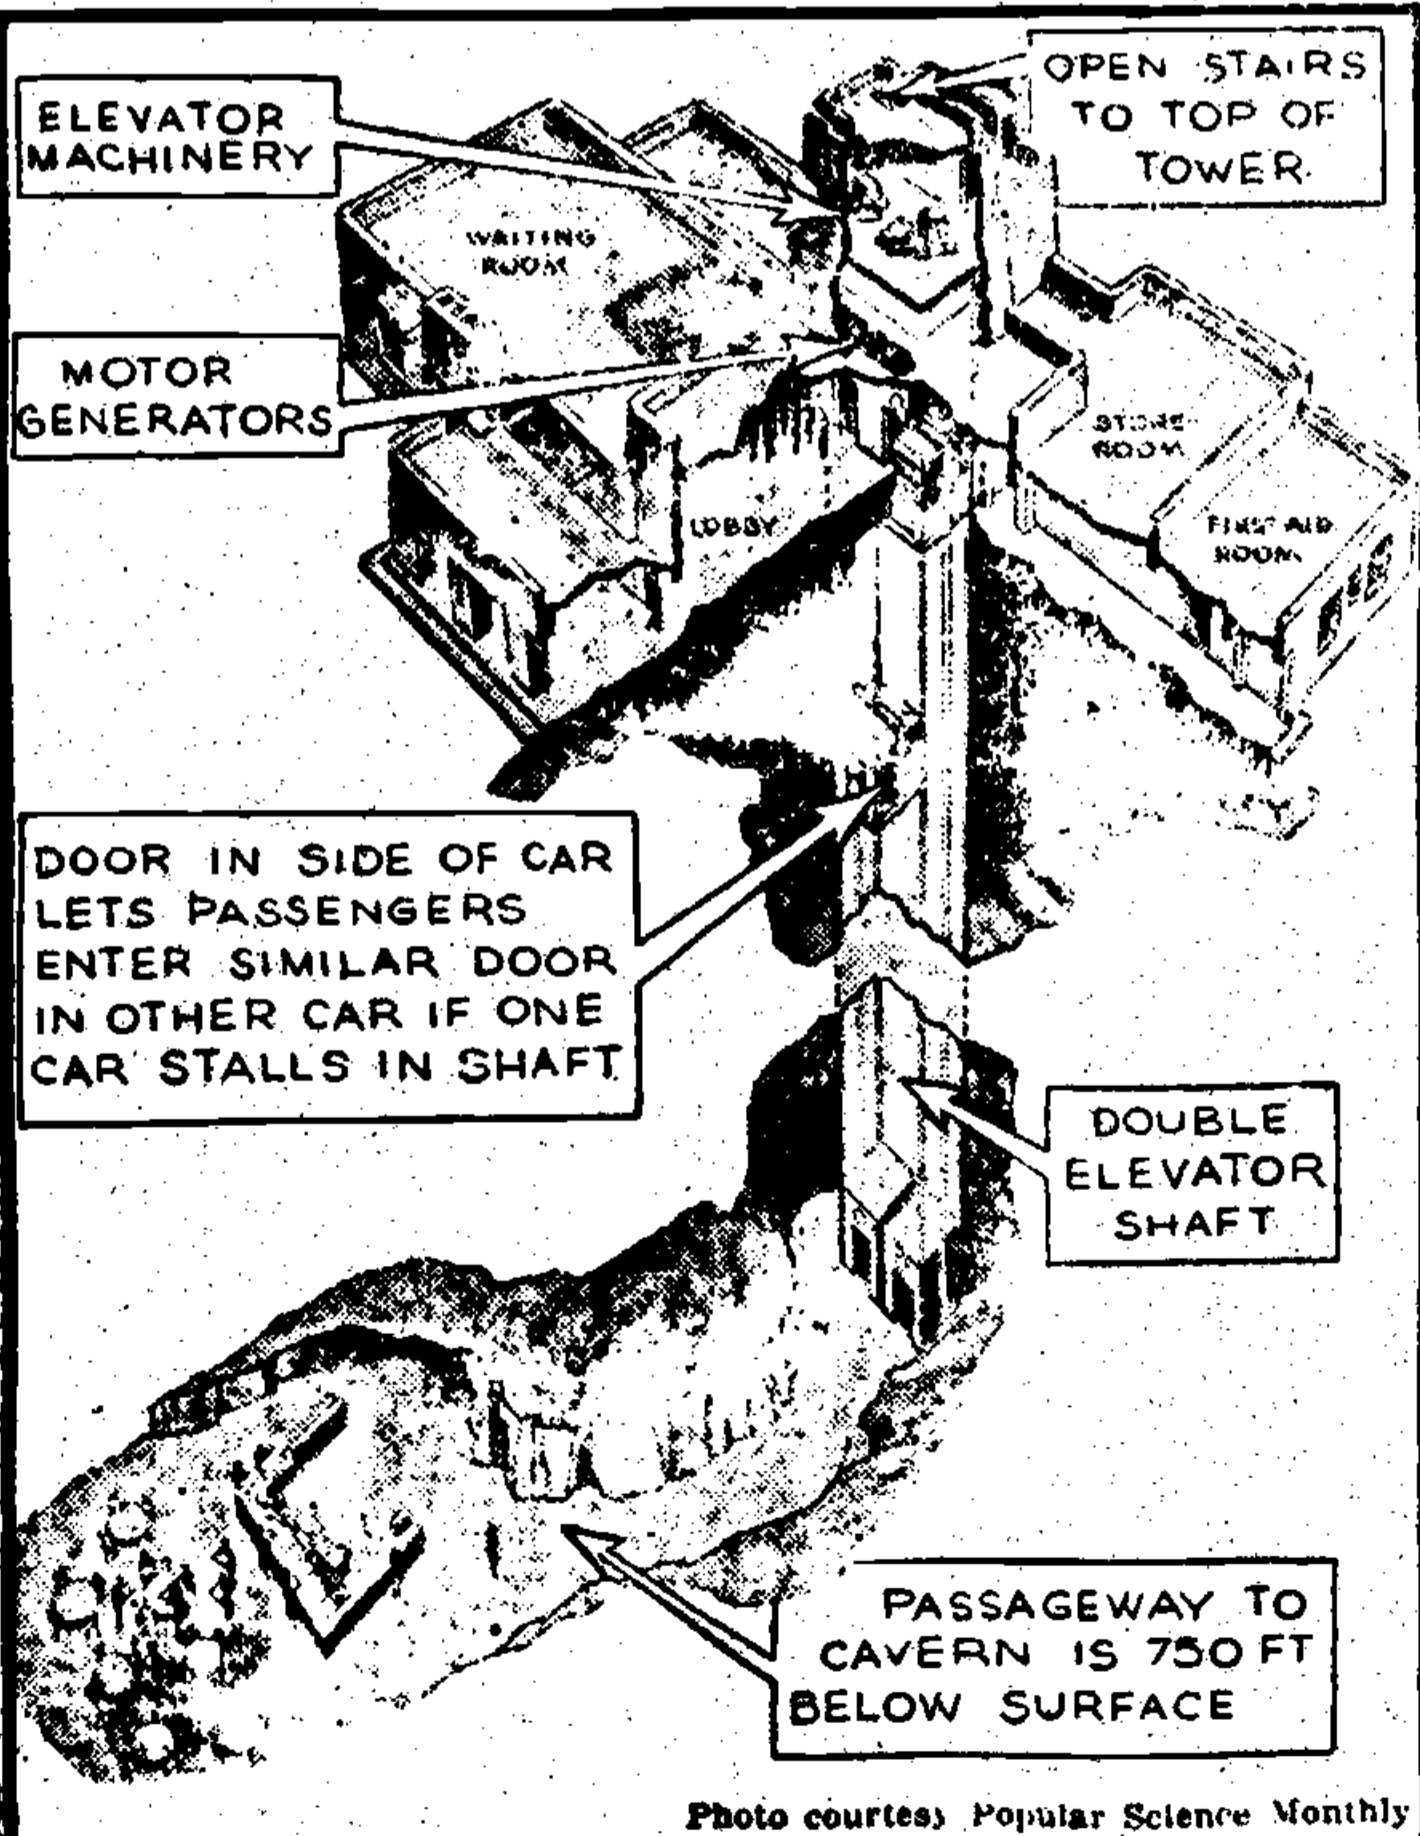

Photo courtesy Popular Science Monthly

Visitors to the immense Carlsbad, N. M., Caverns will no longer have a 750-foot climb. For the caverns now have elevator service comparable to the most modern city skyscraper.

Recently one elevator was installed in the huge cavern to accommodate the thousands of visitors that seeked there annually but this proved inadequate and new engineers of the Otis Elevator Company are working day and night building a second elevator

running from the depths of the cavern to be in operation on September first.

This elevator is the regular skyscraper self-leveling type. It has a capacity of 2000 pounds and operates at a speed of 700 feet per minute, and will carry twelve passengers in addition to the operator.

With the exception of the Empire State Building elevators, those in the Carlsbad Caverns will be the largest single lift passenger elevators in the world.

#### Your life's savings

Have you a beautiful home—purchased after years of saving? Many people have invested their life's savings in one property and its destruction would be ruinous. Fire is the most dangerous enemy of your home, but if a reliable agent is providing sound insurance protection you need not worry about financial loss from fire.

Representing sound stock fire insurance companies. Write, phone or call for information
