Republican County Convention.
A preliminary county convention for Oswego County will be held at Washington hall, in the village of Manlius, N. Y., on Wednesday, August 2nd, 1900, at 8 o'clock A. M. for the purpose of nominating candidates for county judge, county treasurer, special surrogates and other officers to be voted for at the next general election, and to transact such other business as may properly come before the convention. By order of republican county committee.
Dated July 21-1900. N. B. SMITH, Chairman.
J. H. COOPER, Secretary.

Oswego Town Caucus.
The republican electors of the town of Oswego are requested to meet in caucus at Todd's cigar store, Oswego, on Friday July 28, 1900, at 8 o'clock P. M., for the purpose of electing delegates to the county and district conventions, and to transact such other business as should come before the caucus. By order of committee.
J. A. PERKINS, Chairman.

Scraps Republican Caucuses.
The republican electors of the town of Scraps are requested to meet in caucus at Grange hall, Scraps, N. Y., Tuesday evening, July 25, 1900, at 7:30 P. M., for the purpose of electing delegates to the county convention called for Wednesday, August 16th, 1900, at Manlius, N. Y., and also to elect delegates to the district convention hereafter to be held. Owing to the busy season of this year it was thought best to hold the caucus in the evening. By order of Town Committee.

REPUBLICAN NOMINATIONS.

FOR PRESIDENT,
Benjamin Harrison.

FOR VICE-PRESIDENT,
Whitelaw Reid.

MORE ABOUT "UNPROTECTED" TRADESMEN.

In an article in the *Palladium*, already alluded to, designed to array all classes of tradesmen against protection to American industries, the butcher is classified as unprotected. Contrast the difference in the number of those who eat meat in free trade countries and America. In free trade England the great mass of the laboring classes have meat on their tables but very rarely and in many instances they are compelled to abstain from it almost entirely. In America, where our manufacturing industries are moderately protected, the laboring classes have their meals twice or three times each day—as much so as the rich do in other countries. Why? Because they have wages which enable them to afford it. In free trade England it is otherwise. Go into any of our city meat markets and see who crowd them evenings to order their chops, their steaks and their roasts for the needs of the next day and it will be seen that they largely come from the factories and the protected industries, because their customers earn money and can afford it. Is not the butcher protected when his cash sales are made largely to persons who earn their money by protected industries, and who otherwise could not afford meat?

The merchant is classified as among the unprotected. Where there are twenty-five or fifty thousand dollars a week disbursed on the pay roll of protected manufacturing concerns, where does it go to? Why to the merchants and dealers of various kinds of cloths and support the workmen and workwomen. Shut down the starch factory, Conde's knit goods mills, Ames' Iron Works, Wright & Boyle's sack and blind factory, the box factory, etc., etc., and how many stores, groceries, or meat markets would remain in Oswego, and how long?

Is the school teacher protected? How many and what kind of schools are maintained unless all the people earn sufficient wages to support them?

Is the clergyman protected? What kind of churches are maintained and what kind of support do clergymen receive unless people are employed at fair wages? We hear occasionally of the splendid Easter and other offerings at Father Barry's church. Where does the money come from except from the wages earned by his people? Reduce these wages one-half and you will reduce the collection one-half, or more, for the reason that the people will not have it to give. Cut off protection and you will reduce the wages of the laborer one-half, or stop them entirely.

Is the hired girl protected? To be sure she is. If the great mass of the people can not earn fair wages they, in turn, can not afford to hire help in the household. The protected factories absorb nearly all of what would otherwise be unemployed female labor. This reduces the number who would otherwise seek housework, and the price of hired help for the family goes up. Stop the factories and the hired girls seeking employment would jostle each other in the streets seeking for places and the wages would go down one-half at least. But we need proceed no further. That was a fable who does not see that a system which builds factories, builds up

men, why, even the most ignorant or grudgingly begrudging protection to a community where no money or scant wages are earned, pennies and nickels are scarce and he would soon dig out for a community where protected interests leave something among the people.

A strike of 5,000 New York cartmen is threatened unless the builders recognize their union—*Palladium*.

The *Palladium* neglects to add, "the strike was all owing to the infamous McKinley law!

CLEVE AND STEVE.

As many mugwumps and democrats as could be scraped together were at Madison Square Garden, New York, last evening, to hear from Cleve and Steve in person their acceptance of the nomination tendered them in Chicago a month ago. The leading democratic statesman, David B. Hill, was conspicuous by his presence—elsewhere, in Washington, he believes, and so, too, was the leading democratic editor of the country, Mr. Charles A. Dana of the *Sun*, his son Paul, who already gives promise of making good his father's place in democratic journalism, having declined to serve on the Cleve and Steve committee of reception. A democratic gathering, without the presence of Messrs. Hill and Dana, could not be called representative. When the democratic roll of statesmen is called and such names as Hill and Dana are marked "absent," everybody, even the mugwump, knows what is meant by it. It means that the democratic party isn't participating; that it is staying at home, and means to till the end; that is to say, till the inevitable, the election of Harrison and Reid, has been effected.

The speeches of Cleve and Steve were neither enthusiastic nor inspiring. We don't wonder at it. The absence of Hill and Dana, with its awful implication, took the tuck out of everything, especially out of the mugwump candidates.

The head of the ticket touched the keynote of his defeat in referring to "our free and beneficent institutions." Just so. The are "free" and they are "beneficent," and they have been kept so for the past thirty years by the republican party. But for the patriotic and heroic action of the republican party our "institutions" would to-day be neither "free" nor "beneficial." They would be of hardly sufficient consequence either to be worth talking about. The party that has so signally maintained the freedom and beneficence of the "institutions" to which the speaker alluded, and has so sedulously promoted their growth, will be sustained again by the people at the polls. Moreover, they will elect to conserve these great interests the men—Harrison and Reid—who actively engaged in the work of preserving the unity of the country when "Cleve and Steve" shirked the field of danger and of duty.

The present house of representatives is the poorest investment the democratic party ever made.

The World's Fair Directory has expended up to date approximately seven and a quarter million dollars.

The number of telephones in service in the United States is 512,407, and the total length of line is 855,800.

The smallness of Gladstone's majority in Midlothian recalls the fact that he has been twice defeated for parliament.

The famed "Six Nations" in New York state will be well represented in the Indian exhibit at the Columbia Exposition.

The first new wheat to reach New York came from Ohio. There were 100 bushels of it, which graded high and sold for a dollar a bushel.

The Nebraska *Journal* says that there are more Jews in three of the wards in New York city than in the whole of Great Britain and Ireland.

One of the peculiarities of British law is that a property holder may cast a ballot in every constituency in which he pays taxes. This is called "rag-pot voting."

A Dahomey village, represented by 60 or 70 natives and showing their manner of living, will be a feature at the World's fair. Several Amazons of the King of Dahomey are expected to be among the number.

It is asserted that for every four shillings spent in Great Britain on drink, only a half penny is expended on education. If more were expended on education, it might upset the drink, business and that wouldn't do, of course.

The president of the United States receives his salary in monthly installments. On or about the 26th day of every month the treasurer of the United States sends to the White house, sometimes by messenger and on other occasions by mail, a check for \$4,166.66.

It is encouraging to learn, by the New

York *Journal*, that the McKinley bill did not increase the cost of living in the United States, but a little less than one-third of the expenses of the general government.

Let us see. It is only in the McKinley regulated United States, in which strikes occur? And yet a item in the Toronto *Mail* says that all four of the Montreal nail factories "have been compelled to close down owing to the strike of the nail makers for higher wages."

"Owning to the brain that conceived and forever painted by the hand that wrote that free trade message!"—U. Z. M.

Walk right up, democrats, and vote for the candidates whose brain conceived and whose hand wrote that message! Your medicine is before you! Don't make grimaces.

The explanation of the apparent military title of Adlai E. Stevenson, to wit, "General," seems to be agreed upon by all. He won it as the "general" headman of the Cleveland administration. His record of 18,678 decorations of republican postmasters in a single year gives him first rank among the lord high executioners of the universe.

The death of Mrs. David B. Fayerweather releases to the first residuary legatees named in her husband's will the half a million from which her income of \$35,000 was derived. This will make the total gift of the millionaire leather merchant to Yale \$500,000, to Harvard and Princeton each \$150,000, to the Presbyterian hospital of New York \$100,000, and to the woman's hospital in the same city \$460,000. Columbia college also gets \$50,000 additional.

A neat retort is recorded of the Marquis of Carmarthen, the Duke of Leed's eldest son, who at the recent elections in England was returned for Exeter by a large majority. The night before the election, while he was addressing a mass meeting, he was interrupted by a cry of "Does your mother know you're out?"—a reference to his very youthful appearance. "Oh! yes, she knows I'm out," said the young candidate, "and she hopes to-morrow she'll know I'm in."

The Times stopped over with protection arrogance and conscienceless misstatement last night—*Palladium*.

Does the editor of that paper begin to realize that it has been slipping over with free trade for the last four years and that it is now too late to correct its blunders? The producers of this country are "in to it." "Free trade," as the late Andy Johnson would say, "is a dead cock in the pit." The producers know how to take care of their own interests and it is not by the election of free trade candidates that they will do it!

Brazilian imports of cotton cloth from Great Britain, for eleven months ending last May, fell 27,893,400 yards, or from 205,569,430 yards in 1890-91 to 175,516,000 yards in 1891-92, a loss of 18 per cent. The imports of American cotton goods rose from 5,825,344 in the eleven months ending May, 1899, to 8,766,098 in like months in 1890-91, a gain of 2,940,754 or a gain of 30 per cent. The Philadelphia *Press* remarks that "There is every reason in the disturbed political and financial conditions of Brazil in the past year to account for reduced imports such as appear in the English trade returns, but there is absolutely no explanation which can be made of exports from this country, except the reciprocity treaty negotiated under the McKinley tariff."

The commerce of this country has been increased and the McKinley bill did it!—*Palladium*.

That is a great deal of truth to be found in the columns of our neighbor in one issue. Having made so admirable a beginning, now, neighbor, go right on and tell what free trade, which you advocate, will do. Tell your readers the free trade which you advocate will set the rolling mills running, the tin plate factories all going at full speed, will increase the price of farm products and everything produced on farms, but the rolling and iron mills will be in England and Scotland, the tin plate mills will be in Wales, and the farmer benefited will be in Canada! Why, certainly, free trade in this country will be followed by prosperity—but that prosperity will be in Europe!

According to the latest information, the Germans have practically made up their minds to let the French hold an international exhibition in 1900, if they wish to do so, and do their best to insure its comparative failure by opening their own in 1898. The mixed commission appointed to decide the matter has already adopted a resolution asking the Berlin municipality to vote 10,000,000 marks as a guarantee fund. It is very difficult, if not impossible, now to decide which nation first thought of 1900 as an exhibition year, but the Paris correspondent of the *St. James Gazette* says: "This much is certain, whatever intentions they may have had back of their heads, the French did not begin seriously to talk about an exhibition in 1900 until they heard that the idea of holding one in Berlin in that year had taken root."

What the situation Democrats

Embarrassed.

to recognize that. The Democratic states it.

A bright young German at Johns Hopkins university has won fame by discovering the key that will unlock the mysteries wrapped in the celebrated Elftide hieroglyphic labyrinths wholly unknown. Any time that the bright young man is out of a job he can get employment as copy holder in this office.

No Rush for the Democratic Chairmanship. Baltimore (M. D.) American.

Now that the fact is out that it cost Senator Brice \$500,000 for the honor of acting as chairman of the Democratic National committee the rush for the place is not excessive. In fact, this is one instance where the office seems to be seeking the man. From last accounts the man was still trying to get away from it.

Reciprocity Ltd. N. Y. West and Express.

In 1891, for the eight months ending April 30, the exports from the United States to Cuba amounted in value to \$85,584,854. In 1892, during the corresponding period, our exports to Cuba amounted in value to \$46,424,408.

This increase of \$10,869,554, or 30 per cent., was caused by republican reciprocity.

Kentucky Statemanship Rebuked. Indianapolis Journal.

The democratic legislature of Kentucky has passed a resolution demanding that congress investigate the Homestead lists. This is a violent departure from the ordinary states rights doctrine. If congress has a right to investigate a labor riot in Pennsylvania, why has it not an equal right to investigate elect on frauds and negro murders in the southern states!

Democratic Jerry-mandering. Buffalo Express.

Yesterday was apportionment day not only in Erie county but throughout the state. M. Sheehan's scheme was carried out here substantially as "The Express" predicted. Though the vote of the county is nearly evenly divided between the two parties, the Republicans are given but one sixth of the assemblymen. From two out of five members we are reduced to one out of six, and this represents not falling-off in republican votes, but merely Democratic manipulation. Being the strength of the parties on the vote of last fall, it appears that 27,908 Republican voters get but one assemblyman and that 28,683 Democrats get five.

Political Paragraphs from Esteemed Contemporaries.

Ignatius Donnelly will discover several new ciphers when he comes to count his vote for governor of Minnesota.—*Atlanta Journal*.

No third party has secured the electoral vote of a single state since 1860, and no third party is likely to do so this year.—*St. Louis Globe Democrat*.

As Gen. Weaver neither drinks, smokes nor wears, he may experience some difficulty in expressing his opinion of the election returns.—*Washington Post*.

The wagon is loaded down with Harrison men, and with a good Carter on the box is bound to pull through on time and in good shape.—*Brooklyn Standard-Union*.

The democratic cry for Whitney to lead the procession is getting distressing. Please, Mr. Whitney, take charge of the funeral; you furnished the corpse.—*Boston News*.

That faint little whisper from Washington to the effect that congress might soon adjourn has created enough enthusiasm for another Fourth of July.—*New York Herald*.

Great work has been done by the republican congress this year in killing free silver bills. The people will follow up the work by killing the free silver party at the polls.—*St. Louis Globe Democrat Rep*.

When a democrat gets particularly despondent, he tries to console himself by remarking that Illinois, or Ohio, or Massachusetts, or some other equally sure republican state, is "doubtful."—*Rochester Democrat*.

The workmen of Homestead have enough money at interest, in addition to what they owe for their homes, to start a national bank. Is there any place in Europe where workmen are getting along in that way? We never heard of it if there is one.—*Binghamton Republican*.

PLEASANT NOTES.

A MARCH MELODY.

Zip!
I am the boss mosquito:
Sometimes I'm called
Gnat for short.
I am all right,
And hungry enough for six.
I am out for the best
If you think I am satisfied
To subsist on
Lean fishes at summer resorts,
Or on children's faces
With alcoholic breaths.
You are way off.
I shall linger in the moonlight
As long as I can
At midnight's solemn hour
And dine sumptuously on the
Girl graduates and the tempting debutante.
I am content with the blushing cheeks
On next year's June brides
And fill them with the melody
Of my organ.
I am happy that has got sand.
I wear spiffy funny
Shoes, and my kit of tools
Is mostly ginsam.
I am content the girl in the
Lower flat.
Get on to my
Cure.

RAILROAD NOTES.
MATTERS OF INTEREST PICKED UP FROM ALONG THE TRACKS.

The station to be built by the Lehigh Valley company at Geneva, N. Y., will be 100x200 feet and will cost \$32,000.

The Union Pacific has discharged five conductors and ten brakemen from the Cheyenne division for violation of rules.

An order for nine engines has been given the Brooks Locomotive works of Dunkirk, N. Y., by the Buffalo, Rochester & Pittsburg, and states that he found the road in first class condition.

The Allegheny Valley road, which has for many years used Miller couplers on its passenger cars, has adopted the Jaany coupler, and the cars are now being fitted up with them.

The Duluth, South shore and Atlantic has reduced the hours constituting a day's work from twelve to eleven, and has increased the pay of engineers and firemen ranging from 15 to 25 cents a day.

Railroad gross earnings, as reported to Bradstreet's, aggregated \$38,140,000 June, eight per cent. more than in that month a year ago. The gain in May this year over last was less than three per cent, and in April less than four per cent., so that the past month is seen to have brought a distinct improvement, due for the larger part to granger and Eastern railways. For six months the total gross earnings were \$259,509,000, also about eight per cent. more than in the first half of 1891, during which period the increase over six months of 1890 was less than five per cent.

Several sleeping cars are to be built by the Jones Vestibule Sleeping Car company of Denver. There will be features about these new cars that it is claimed will commend them to travellers. One is that the upper berths can be raised higher than in ordinary sleeping cars, thereby giving a better circulation of air in the body of the car. Another feature is that persons using the upper berths can second to them through a space provided between each section, so that it will not be necessary to disturb the occupant of the lower berth, as it is with sleeping cars at present in use.—*Buffalo Commercial*.

Not what we say, but what the people say is what sells DANAS SARPAPARILLA. Be sure it is made in Belfast, Maine.

MARINE NEWS.

ITEMS OF INTEREST TO MARINERS AND VESSEL OWNERS.

BUFFALO, July 20.—The lake and rail freight rates are very badly demoralized, especially eastbound. Notice has been received from Duluth making the 30 cent flour rate from Duluth to New York 17 1/2 cts on and after to-day. The 17 1/2 cent rate from Chicago to New York is reduced to 15 cents by circular, and it is stated by authority that there is more sixth-class stuff, especially for export, coming by lake from Lake Michigan at 12 1/2 cents than at any higher figure. The lake-line managers, by taking no action, decline to interfere with the work they claim has been done by the trunk lines. From Buffalo eastward the situation is quite as peculiar. There is reason to believe that the 12 cent flour rate to New York is not adhered to, and the regular wheat rate to New York by the New York Central is 4 1/2 cents, which is said to include about a cent in charges at Buffalo and another in New York. This has practically shut out the other roads, and they are doing very little. It really looks as though the New York Central was engaged in freezing out all competition.

The canal steamer Hurst is reported by ned to the water's edge. She was up-bound with some court freight between Albany and Troy. Her cargo is insured in the Providence Washington and her hull in the St. Paul.

The Tioga explosion case of the Union Steamboat company against the Brights has been settled, and both parties have noted an order of discontinuance. It is understood that the settlement cost the Brights about \$50,000 in clean cash.

The city elevators are full of hot corn, most of it coming billed at a very low grade. The propeller Tampa was 90 bushels short on such a cargo this week.

The whaleback propeller Thomas Wilson on her visit here was loaded with a cargo of 2,758 tons of coal by the Reading company in three hours, and unloaded at the Lehigh docks in West Superior in ten hours. This is record-breaking time.

The propeller Tower is in dock to repair her stern bearings and the Waikoua is to-day to be taken to the

Both Events of the Day Finished in Three Straight Heats

There was a good attendance at the second day's meeting of the midsummer races of the Phoenix Driving Park association yesterday. The day was all that could be desired for the sport and the track was in excellent condition. In the 2:30 class M. J. Henderson, Almon Orton of this city owner, was a winner in three straight heats. Coxzackie King, from Green and Noble's stock farm at Coxsackie, N. Y., played a second fiddle, and took three seconds without a skip. E. A. Van Vliet's Almont Protection, an Onida trotter, was distanced.

In the 2:37 class, trotting, C. D. Ely's Galen Prince repeated the performance of Henderson and took three heats straight. Harry Cardinal finished first in the first round, but got second place by taking second in the remaining trials.

THE SUMMARY.

Phoenix Trotting Park—Midsummer meeting—second day, July 10, 1899: weather warm and pleasant; track fast; third race, trotting, 2:30 class; purse \$200.

Almon Orton's M. J. Henderson..... 1 1 1
Green & Noble's Coxzackie King, ca g..... 2 2 2
J. H. Monroe, Kitchenella, b m..... 3 3 3
