The board of supervisors completed the work of the session and adjourned Thursday. The tax rate for the town of Waverly this year is considerable lower than last year, which will certainly be good news to the taxpayers. Last year the rate was: General tax \$2.25 per hundred assessment, and 80c per hundred for highway purposes. This year the general tax will be \$1.90 per hundred, and the highway tax will be 70c per hundred assessment. If your assessment is \$1,000, your tax will be \$5.00 less than a year ago. The above figures do not include the electric light tax which will be practically the same as last year and is paid only by those residing in the electric light district. Supervisor M. B. Bamedell is entitled to no little credit for the result obtained.

Monday afternoon a gang of woodmen, mostly Indians, boarded the N. Y. & O. train at Derrick. Some of them were under the influence of liquor to such an extent that they created no little disturbance on the train. Constable William Kidney, of this village, was notified by wire to be at the train upon the arrival here. He responded to the summons and arrested a man, who when arraigned before Justice of the Peace W. A. Conley gave his name as Thomas Cook, and his home as Cornwall. Being intoxicated he was committed to the county jail to await removal. He was brought back from Malone Tuesday and pleaded guilty to the charge of public intoxication and Justice Conley sentenced him to serve 30 days in the county jail and pay a fine of \$10. His Christmas is not likely to be as merry as he anticipated.

C., Dec. 16.—In an interview to-day in regard to the state chairmanship, Congressman Snell made the following statement: "While I highly appreciate all of the kind offers of my friends in connection with the chairmanship of the Republican State Committee, still I feel that I am compelled to decline to be a candidate for a number of reasons. Perhaps the most important to me is the fact that I am not a native of this state. I would not feel that I could give full and complete attention to my congressional duties and these duties are paramount with me because of the express will of the people of my district. As chairman of the State Committee I would have a definite program of matters which I would try to accomplish and the carrying out of these plans would need practically my entire time. If the house of representatives is organized by the Republicans after March next, as I believe it will, long sessions of hard work will ensue and the necessities will require that every member of the majority must be constantly in attendance in the city of Washington during the sessions. I do not believe therefore, that it would be physically possible for me to attend properly to my duties as a representative in congress and also act as state chairman in the manner in which I believe the office should be conducted. My first obligation, in my opinion, is to the people of my district who have but recently elected me to congress, and under those circumstances I have decided not to be a candidate for chairman."

Ogdensburg Eks for some time past have been using potatoes as a pass word to induce business. That is, no one was admitted until he had dropped one or more tubers in a barrel provided for that purpose. As a result of this novel method, the lodge will be able to distribute 92 bushels of potatoes among the poor of the city.

New York state postmasters received notice after January 1st that the dead letter office of the state of New York will be located in New York City instead of Washington. A saving of time and expense is expected to result from the change. The dead letter office in Washington received last year 10,830,800 letters and parcels which had been carelessly mailed or otherwise went astray. The government realized from the sale of dead letter matter which could not be traced to the sender, the sum of \$53,665. Checks, drafts and valuable papers, with a face value of \$2,130,118 were found and nearly always restored to the senders or to those for whom they were intended.—Ex.

A. E. JONES' NEW PUBLICATION. Washington Correspondent Preparing to Launch Monthly at National Capital. "Achievements in the World's Work" with J. E. Jones as editor, is to appear early in the new year.

A prospectus, or sample specimen has been issued, and a copy of it may be seen at the Adirondack News office. Evidently "Achievements in the World's Work" will be developed along the lines of furnishing a cherry, opportunity to the things that count in the world's work.

The little sample book relates a human interest story of Henry Ford, as the principal article. It tells respectively of B. T. Spahr, of Milwaukee, who has invented a system whereby the roll out of the house of representatives may be completed in three minutes, thereby saving two full months of the time of convening during a long session. "The Light of the World" traced from the earliest burning brands and the operations of the firefly, down to the bright electric ray of the present time, is the basis of another article. The evolution of animal and human life, recording the disappearance of the extinct specimens, with up-to-date comparative work, reference to man's life and war, furnishes another story, that is not dull, but rather breezy, informative and refreshing. Epigrammatic paragraphs enliven the pages.

"Achievements in the World's Work" will essay a style known as "popular" reading. Men and events will be treated in an intimate, familiar manner; and it is likely that human foibles will not be overlooked in the interest of pleasing the vanities of those who may be generally regarded as great.

None have been privileged to see the readers of the Adirondack News of Mr. Jones' writings in these columns. The appeal is being made first to those who have felt an interest in Mr. Jones' Washington letter to become the "charter member subscribers." Among early articles will be intimate personal sketches concerning Admiral Peary, discoverer of the North Pole; Alexander Graham Bell, inventor of the telephone and Major General Goetz, who built the Panama Canal and General Goram, who has achieved an insight in sanitation. There will be stories of popular interest covering the trivial incidents of life, as well as industry, war and peace, told in a way that will be appreciated by those who delight in snappy stories, or solidly frozen chunks of fact.

"I believe the readers of my Washington letter will furnish for 'Achievements in the World's Work' 2,500 subscribers" says Mr. Jones. "I write for an audience of several hundred thousand readers throughout the United States and many of these have expressed a personal interest in my work. My writings as a newspaper correspondent will go on unintercepted, but there are things that I can say in my own publication that are not in good taste in writing for someone else's paper. I am asking that part of the American public with which I have been in direct touch for several years, to back up their faith in my ability to give them a dollar's worth of literary dope in twelve installments."

The attached coupon should be filled out at once and handed to the editor of the Adirondack News or sent direct to Washington. U. S. PRESS ASSOCIATION, Bond Building, Washington, D. C. As per the announcement in the Adirondack News you may enter my name as a "charter member subscriber" to ACHIEVEMENTS IN THE WORLD'S WORK. Send me a copy of the first issue, and upon receipt of volume one, I will remit One Dollar in payment of the first twelve numbers. (Signed) _____
