## What's Your Share?

Oswego County's share in the record-breaking federal government budget this year will be about \$31,000,000. That's the amount estimated to leave the county by the time 1961 rolls as part of the overall \$81 billion dollar budget.

Per person in the county? It will run about \$360. These were figures out of Albany this week which also revealed that New York State's share of the federal government cost will be \$11 billion, and about \$274 million more than last year.

But that's not all. Welles A. Gray, director of the Empire State Chamber of Commerce, told The Patriot that former President Eisenhower's budget was based on existing law and did not include estimates for various new programs that may be proposed by President John F. Kennedy. Depending on what Congress finally decides, these expanded activities, it was pointed out, could add another \$5 billion.
