

THE FULTON PATRIOT

ESTABLISHED 1837

FULTON, N. Y. WEDNESDAY, JANUARY 8, 1930

Vol. 94; No. 2

BILL BOOSTER SAYS:

We have received the following letter which, published herewith, is self-explanatory. We gladly give it space:

January 1, 1930.
Dear Mr. Booster:
May we use your column to express to the people of Fulton our appreciation of their splendid support for the appearance of the Wesleyan Glee Club over the last week-end? It really did become, as we had hoped, a community event.

The attendance at the concert, the generous offering of two hundred and nine dollars, the very gracious hospitality of the opened homes, and the enthusiastic reception of the lunch-club were particularly pleasing to the men of the glee club. They left Fulton with the praises of the city on their lips. Again it is that "Fulton Full-tilly."

Cordially yours,
Albert E. Legg,
Robert C. Macdonald.

Whew!!! And again—
"Whew!!!!"

Proprietors of two of our dry goods stores assert that not at any time have their stocks of thread lacked the article, No. 80 white sewing thread, named in our Booster column of last week as that which a Fulton woman had been unable to find after visiting four of the local stores.

The proprietor of one of the stores called attention of the writer's wife to his thread case and said wife avows that there was a plentiful supply of No. 80 white and others. However, the merchant explained that all thread numbers are constantly in stock.

The other merchant was visited to read the thread case. The merchant explained the way to his thread case and promptly supplied the citizen's demand, whereat the citizen told him that he did not care to purchase but wanted merely to satisfy himself as to whether the merchant had the article in stock. The merchant informed the citizen that his thread case had not lacked the number in question.

"Well, that's that, and we still say: "Trade in Fulton."

The members of the park commission are jubilant over the fact that their judgment in securing the services of the Davey tree experts has been justified by the manner in which the trees under the care of the park commission withstood the weight of the ice and snow during the recent strenuous time.

Dr. P. C. Knapp of the commission informs us that the commission has expended about given attention by the experts and that all the trees that were given attention by the experts vigorously withstood the ice and snow and came through uninjured. Only one tree in the park broke under the strain and that one was marked for destruction next spring.

Also, the Fulton Light, Heat & Power Company feels well pleased with their employment of the same experts, noting that the trees for treatment of which the company employed the experts staunchly withstood the storm and the subsequent weight of snow and ice.

How thankful were the dairymen for the thaw of the past week. Some dairymen brought cans to Fulton and filled them with water for their stock just prior to the break in the weather.

Wells were dry, or fast becoming so. You city folks know little about such matters. In the country it's a most serious matter.

Mr. Campbell of the Best Ice Cream Co. office assisted several dairymen in filling the milk cans with Fulton's wonderful water for use of the stock.

THE COUNCIL ORGANIZES FOR COMING TERM

The common council met Friday night for its first meeting of the new year. Charles D. Wilcox, president of the board for the last two years, was again chosen unanimously. Two new aldermen, Frank Root and Eugene Searles, Republicans, were presented.

The Fulton Patriot was named the official paper.

The amount of \$6,587.43, due the Fulton Light, Heat & Power company from accumulations between 1923 and 1927, was ordered paid in three yearly amounts.

Commissioner of Public Works H. S. Andrews was authorized to attend the national road builders' convention to be held at Atlantic City Jan. 16th.

Mayor Baldwin proposed that that part of the abandoned road bed of the Ontario & Western railroad, between Fourth and Division streets, be paved during 1930 to form the first link in the east side boulevard.

He pointed out that the new street would alleviate traffic congestion in the hospital and school districts. The east side boulevard problem has been discussed from time to time since the railroad abandoned the tracks running north and south through the city two years ago. The boulevard when completed will run from state high-ways at Fourth street to the east river road at VanBuren street.

The mayor suggested as part of the 1930 program that Rochester street, between Third and Fourth streets, be paved; that Worth street be resurfaced and larger water mains be laid in the Sixth ward to afford better fire protection.

Mayor Baldwin announced the following standing committees: Finance, Wilcox, Scott, Howard; auditing, Wilcox, Scott, Howard; insurance, Scott, Searles, Rogers; paving, Rogers, Searles, Root; ordinance, Howard, Root, Scott; office and repairs to city hall, Scott, Howard, Wilcox; claims and grievances, Root, Searles, Rogers; sewers, Searles, Root, Rogers; elections, Howard, Root, Rogers; lighting, Wilcox, Scott, Howard.

An amendment to the city charter that provides changes in salaries of public officers become immediately effective upon the approval of the council, will be made a local law following a public hearing before Mayor Baldwin at 8 o'clock on the evening of Jan. 17th.

The resolution for the amendment was introduced by Alderman Wilcox and was unanimously passed by the council.

The section of the city charter that the amendment will effect now provides that a change in the salary of a public officer to become effective must be made two months before taking office.

The amendment also removes a clause providing for the payment of court costs in litigation matters to the city attorney, in addition to his salary and provides instead for the payment to him of approved expenses incurred in connection with civil court actions.

WALDRADT ST. SCHOOL.

Marjorie Royce, grade 3A, with an average of 97, led the honor roll of Waldradt street school for the December quarter. Emogene Doud, 2B, Ruth Barker, 3A, and Chester Okoniewski, 4B, followed, each with an average of 96.

The honor rolls follow:
Grade 1B—Clifton Breads, 94; Theodore Pittsley, 90; Robert Newsbaum, 93; Phyllis Dasher, 93.
Grade 2B—Thomas Gillard, 93; Roseman Story, 91; Mary Hosler, 92; Constance Palmer, 90; Robert Keding, 93; Emogene Doud, 96; Betty House, 92; Bertha Smith, 90.
Grade 2A—John Kitts, 91; Curtis Palmer, 91; Margaret Judd, 95; Helen Rugg, 91; Jean Shaver, 95; Mildred Stuart, 95.

Grade 3B—Ruth Barker, 96; Homer Ludington, 91; Marjorie Royce, 97; Mito Beles, 95; Curtis Palmer, 94; Betty Waldron, 91.
Grade 4B—Lucille Everly, 90; Ruth Keding, 92; Thomas Story, 95; Lillian Hawthorne, 92; Chester Okoniewski, 96; Agatha Waldron, 90; Jane Yandoh, 93.

POMONA GRANGE.

Oswego County Pomona Grange will meet in Grange hall, Pulaski, Jan. 14th. It will be the first meeting of the new year and Master Charles Kent urges a large attendance.

A splendid program has been arranged as follows:
Morning session, 10:30—Roll call of officers; opening in fifth degree; reading of minutes; appointment of committees; applications for membership; passing to the fourth degree; presentation of resolutions; resolutions referred to committees for action; unfinished business; new business; report of county deputy; reports of officers; committees' reports.
Afternoon session, 1:30—Reports committees; conferring of fifth degree in full form; installation of officers for 1930; lecturer's program.
Address of interest to dairy farmers by M. B. Garlock, Utica.

Our cooking school will reopen Tuesday, Jan. 14th, at 7:30 p. m. Owing to the tremendous sale of Corona cookers during the holidays Tuesday evening's session will be devoted to a demonstration of the Corona cooker. Mrs. Karl Dryer in charge.

DIARYMEN TO INCREASE MILK PRODUCTION

E. J. Lonis of Hannibal, was elected chairman of the executive committee of the Oswego County Dairy Improvement council at a meeting of the committee at the Adams House last week. Walker S. Rapley was elected chairman and Henry L. Page, Oswego county agricultural agent, secretary-treasurer.

Louis Branche, president of the Dairyman's League in Oswego county, spoke on the league program and ways of adjusting it to present conditions in New York state.

Stating that 10,000,000 pounds of milk, valued at \$250,000, come from outside Oswego county being used by the Peter Cailler Kohler Swiss Chocolates company, Fulton, W. Hill, manager, told the council that as soon as local production and markets became stabilized, his organization stood ready to purchase supplies from local dairymen.

The council endorsed efforts of the Farm Bureau to increase the number of dairymen in the county both by the Dairy Record club and the Dairy Improvement association.

It was decided to hold two meetings during the year, the purpose of which will be to inform county dairymen of the progress of the dairy industry, both in New York state and in the United States. The meetings will be held in Pulaski and Fulton and the dates will depend upon the availability of specialists.

Proposed efforts of the Home Bureau to feature a "Milk for Health" campaign, which will include the securing of "Healthy" milk from the Dairyman's League, for work in the county, was endorsed.

Short time and long time programs were adopted for the coming year in regard to dairy work in the county. In the short time program the dairymen agreed to sell old or low producing cows to the butcher to reduce their feed bills by feeding 20 per cent feed with mixed hay, 16 to 18 per cent with legumes and 12 per cent dry cows; dry off cows that have been milking over a long period; veal more calves during the winter surplus period of December, January, February and March; substitute whole milk for milk powder; the calf meal in feeding calves that are being raised; test cows for tuberculosis because of the relatively high prices of beef and because indemnities are satisfactory; insist that all dealers, co-operatives and independent dairymen keep a demerolizing surplus of milk.

January, February and March, and to use more milk in the home. This latter condition will be carried out through a campaign on the part of the Home Bureau.

In the long time program the most efficient and economical production of milk was stressed. With the aid of records in cow testing associations or dairy record clubs, to feed the cows to the limit of their capacity and then sell all unprofitable ones by selling them to the butcher; to exhibit on long time program at fairs; to sell cows immediately, breed cows in December, and January for fall production, avoiding breeding cows in March, April, May and June. There add to the trouble-free surplus; feed 20 per cent feed mixed with hay, 16 to 18 per cent with legumes and 12 per cent to dry stock. Make the 16 to 18 per cent by mixing 12 to 20 per cent give cows a normal six to eight weeks' rest; test cows for tuberculosis which best prices are high and indemnities satisfactory; plan to grow the maximum amount of high quality corn roughage and pasture to keep down the cost of production; select calves only from the best record cows for raising; encourage greater co-operation of milk for fat.

Co-operation between organizations of both the city and the county was agreed to.

HOSPITAL AUXILIARY OFFICERS.

Mrs. Clayton E. Bixby was re-elected president of the Ladies Auxiliary of Lee Memorial hospital Thursday afternoon at the annual election. The meeting was held at the nurses' home.

Other officers elected were: Mrs. George Webb, first vice-president; Mrs. L. Fowler Joy, second vice-president; Mrs. A. E. Kraus, third vice-president; Mrs. Frank Morin, recording secretary; Mrs. Frank McNamara, corresponding secretary; Mrs. L. W. Emerick, treasurer; Miss Elizabeth Lee, chairman of supply committee; Mrs. R. D. Parsons, chairman of work committee.

The following were chosen to the board of governors of the hospital: Mrs. E. A. Gladman, Mrs. B. W. Bennett, Mrs. J. R. Murphy, Mrs. Wilbur Wright and Mrs. L. C. Foster.

INCOME TAX BLANKS.

Work of "stuffing" the envelopes containing Federal income tax return blanks and white paper containing the new income tax rates has been completed by the staff of Acting Collector Claude Bonsted. The 60,000 envelopes are now being held awaiting word from Washington to send them out.

Usually the blanks are mailed out on the first day of the year, but due to the change in the law this year it was necessary to hold up the mailing until the "riders" had been attached to every blank. Mr. Bonsted expects word to release the blanks within a week or ten days.

WRITES BEST LETTER AND WINS RANGE

Mrs. E. J. Bidwell is announced as the winner of the Armstrong Electric Range given as a prize by the Fulton Light, Heat & Power Company for the best letter dealing with the uses of the Corona cooker. Mrs. Bidwell's prize-winning letter follows:

"My Dear Sirs:
I am so sorry to learn from your recent letter that you and the family are so unsatisfied. I know it must be very discouraging to have the children, the maid leaving and the hubby's meals not on time, thus upsetting the general routine of the home. I realize as much as you that half the life of a good wife and mother is spent in the kitchen. I look back now and think of the confinement and disappointment that I experienced when I first learned to cook, and I wonder that I ever came through alive. If only that you would let me help you solve the servant problem.

"A Friend in Need is a Friend Indeed" is an old, old saying, but it still rings true, and I feel now that I have discovered a real true friend and helpful agent. Before I tell you its name, I want to relate a few of the numerous tasks it performs for me each day.

"In the past, Sunday dinner has always been a hectic affair, for I have either had to prepare it the day before or get an early in the morning. But now I only have to reheat my cooker, dress, slip in the robe, go to bed, without a care in my mind, and when I awaken I never late any more. My eyes coked to get up, I think, I never have to get up each over my dinner, and my cooking is continuous.

It gives me time to finish my work, and I can enjoy the delicious flavor of my cooking. In this cooker, and I can prepare it with some I have at hand, and inns where a lot of French chefs are employed.

The gravy is certainly an accomplishment, for the meat juices are retained, thus preserving the flavor and the softness of the meat. It is always the same as if it had been heated for hours.

I feel that my cooker has already paid for itself in economy of fuel and by saving me the time of buying a new one.

To have a picnic, we only have to place our cooker in the car and the stored heat keeps our dinner warm, whether it is one hour or three before we reach our destination. On hot days it has another valuable purpose. No asstion of this kind was appreciated. I fill the cooker up with iced fruits, such as lemon and orangeade, or even water, and it acts as a thermos jar, preserving its coolness for hours.

"It is most convenient for me on afternoons when I am playing bridge or shopping. I never have to get up for supper as of old, for my faithful little friend has been cooking it while I have been relaxing and enjoying myself. The family can come home and help themselves to much better food than I could ever prepare.

"I have not only roasted meats, but chicken, potatoes, delicate brown in color and so tender the meat falls away from the bone. I use it for all my casserole dishes, making of soups, stews and chowders. The best part is that you cannot detect any unpleasant cooking odors throughout the house. Also it is so compact, it fits your kitchenette.

"As for baking, it is unexcelled for biscuits, cake and pastries. I never fear any more if my oven is too hot or too cold, for by following the directions enclosed in the cooker I have vet to know bad luck in baking. I have also baked potatoes, Boston baked beans, all kinds of vegetables, cooked cereals, stewed fruits for sauces, steamed puddings and brown breads and made delicious candies.

"Never before have I been able to pan-broil successfully. Chops and steaks are appetizingly broiled and all the juices preserved. I have even had omelets turn out light and fluffy the first trial. I have French fried potatoes and fried cakes with amazing results. This fall I made some delicious jelly and preserved some fruits. One evening recently I made coffee for ten guests in the cooker and the amount served 20 cups, all made at the same time. This week, since the snow and ice came, I had frozen pudding and mousse, for by packing the containers in snow and ice and replacing the cover, it served its purpose as Kelvinator.

"All these uses and many more I have not space to elaborate on are contained in this little marvel, the Corona two-hen electric oven cooker. Corona means economy to me, for it has been my experience that this cooker can accomplish more with less expense attached than any so far on the market.

"If Santa Claus be merely a myth or a realization of you this year, do get your order in early and I feel more than confident that Health and Happiness will be yours throughout the coming New Year."

Sincerely yours,
Francis.

WELFARE LAW EFFECTIVE JAN. 1 DIVIDES COUNTY

"Public welfare" replaced the word "poor" in the lexicon of official charity agencies in this state on Jan. 1st. For years there has been a tendency to get away from designations of public dependency as poverty, and its relief as charity, but it was not until enactment of the so-called Fearn law by the last legislature that the change was given official recognition.

Many changes in administration are provided in the new law. Several of these have already been provided for in Oswego county by action of the board of supervisors at its last session. One of the most important was that of making the care of the poor wholly a town charge. Heretofore, the county was the unit of assessment for the cost of caring for its poor in the county home at Mexico. Under the new law and procedure, the county is created into welfare districts, with the city of Oswego forming a separate welfare district, and the cost of caring for the poor of a certain town or the home is charged directly back to that town. Thus each town cares for the cost of its own dependents. The city of Fulton is also included in the county welfare district.

The city of Oswego is not having a home of its own to take care of its poor. Hereafter the city will not be taxed for the support of the poor of the towns, which will be so much saved to the taxpayers.

Officially, hereafter, the county superintendent of the poor will be known as the commissioner of public welfare. Similarly, the title of overseer of the poor is abolished in the towns and the administrators of the poor law will be known as public welfare officers. Each town board may appoint a public welfare officer or the supervisor may act as such officer. The town board shall fix the salary of the town public welfare officer or fix the amount per hour to be paid him when he is performing the duties of his office.

Another section of the law provides that the board of supervisors may authorize the appointment of deputy commissioners or welfare assistants and employes and may fix salaries. The county commissioner is to make the appointments with the authorization of the board of supervisors. No action of this kind was taken at the recent annual session of the board.

C. A. Stone, who has been county superintendent of the poor for many years, will have the distinction of being the first commissioner of public welfare in Oswego county. He is one of the best known county poor officials in New York state, and has served as president of the association of superintendents and officials in the state of New York.

KING PREDICTS BUMPER CROPS.

Announcing his 1930 forecasts for the year just completed, George King made the following statement last week:

"I've been doing this work for 50 years. As I remember, it was at the age of eight that I learned how to forecast, or about the year 1880.

"I was born in 1872. At that time my mother was ill and a woman particularly kind came to our home to help. This woman was very kind to me. She would take me to the fields, especially during strawberry time, and read to me. On one of these occasions she was reading from a Bible and something at the moment prompted me and I began to read weather. This happened in Canada.

"The first 20 years of this work I didn't do as well as I do now. However, I was able to tell the people what kind of crops they may expect. After I came to this country in 1887 I began to learn more. What I know about agriculture I learned from my parents on the farm.

"In preceding years I have told the public that kind of crops they would have. If you recall, in 1928 I said the crops were going to be poor and worse in 1929. But as I see now, an abundance of crops may be expected for the year 1930.

"It is my opinion that the first part of the winter of 1930 will be light, only the English coast will suffer by severe storms. These will not effect us much.

"I may not give the forecast month by month this year, as it requires too much work. However, I will send to a number of places the whole forecast for 1930 as I did in 1929.

THE COLWELL CHILD CASE.

Surrogate D. Page Morehouse of Oswego presided at the hearing held last week in regard to the custody of Amy Colwell, 11, adopted daughter of Mr. and Mrs. Herbert Rude of 557 North First street, Fulton. The Rudes are grandparents of the child.

The case of Miss Marie Colwell, the petitioner, was closed after testimony of a private detective and other witnesses was heard. The defense opened and the hearing was adjourned to Jan. 10th at 10 o'clock.

The action is the result of a complaint made by Miss Colwell, aunt of the child, who alleges conditions in the Rude home are not as they should be for the proper rearing of a child.

Marketing Trip to New York

Prepared by the Agricultural Committee of Fulton Chamber of Commerce.

Our good friends in the neighborhood who grow the fine lettuce, cabbage, spinach and other vegetables for which the district is famous will doubtless be interested in the trip to New York City which is being arranged by Henry L. Page, County Agricultural Agent.

The purpose of the trip is to observe the methods of handling, packing and trading in fruits, vegetables and eggs. Educational visits will be made to the New York Stock Exchange, Federal Reserve Bank and the U. S. Appraisers' store where import duties are affixed.

The last afternoon will be devoted to a sight seeing trip. Buses will be provided with a trained lecturer to point out places of interest.

The party leaves on the New York Central morning train (Oswego, 8:50 a. m.; Fulton, 9:18 a. m.) Sunday, January 19th, and returns Thursday morning, Jan. 22d. Reduced rates for the party have been obtained.

The expenses of the trip will be between forty and fifty dollars, depending on how expensive rooms one occupies and the meals selected.

Reservations must be made by 5 p. m., Friday, Jan. 10th. Phone or call on Mr. Page promptly if you consider going.

This trip should give one an insight into a very important part of the business and usually the more one knows about all phases of this business, the more successful he can become.

Note—The members of the Agricultural committee of the Chamber of Commerce are: Fred J. Campbell, chairman; Charles Hill, Lee Wilcox, Gerald Ludington, Sidney Fitch, W. C. Hubbard and Prof. Ernest Black.

THE HEALTH PROPERTIES OF FISH AS FOOD

One need one-half million tons of soil matter is washed from our farms and pastures annually, according to a recent report. This is estimated to contain 26,000,000 pounds of plant food, or 2 times that removed from the soil by crops.

Much is said about erosion and loss of soil fertility and already there is discussion regarding the future food supply of the world. In addition, we hear much about the deficiencies of certain lands in factors of importance to good health. These are: iodine deficiency, which is the most more prevalent; soils characterized by a deficiency of phosphorus, by acid conditions and by alkaline conditions.

Throughout the centuries the rivers have been carrying the land products to the sea, enriching the waters, with the result that sea water contains practically all known elements in solution. This richness of the Coastal waters in organic materials, in minerals and the gases from the air, combine to produce a luxuriant growth of microscopic plants, and the combination of the two constitute the basic food supply of marine life.

This marine life is not confronted with deficiencies such as may be found in many land areas.

In pre-war days, Germany used quantities of Chilian nitrate in mixed fertilizers. This contained iodine as an impurity. With the supply cut off during the war, the Germans manufactured "air nitrates" for explosives and this has largely replaced Chilian nitrate for fertilizer since the war.

Air nitrates are deficient in iodine. A few years ago, German nutritional experts became much disturbed by the increasing prevalence of goiter among both human beings and animals, according to Clark. Tracing the iodine deficiency to the use of air nitrogen in fertilizers, every encouragement is being given to the consumption of sea foods and the use of fish meal as a stock food and for fertilizers.

Consideration of the general situation leads to the conclusion that man should draw more heavily upon the resources of the sea, supplementing land crops and restoring to the land some of the richness which has been lost.—Lewis Radcliffe, Deputy United States Commissioner of Fisheries.

NEW FARM BUREAU AIDE.

Nelson W. Mansfield of Cherry Creek, has been appointed assistant county agricultural agent of the Oswego county Farm Bureau, to succeed former assistant agent Henry L. Page. The appointment was made Jan. 1st. He is a graduate of the College of Agriculture of Cornell University, class of June, 1929.

Committees appointed to act during the coming year are: Marketing—E. J. Lonis, W. C. Hubbard, John Mayne; Vegetable Gardening—P. D. Verrouse, W. C. Hubbard, Fred Cole; Dairy—Lee Loomis, Charles Kent, W. J. Hall, Forestry—M. N. Wadsworth, John Mayne, Roy Tovey; Organization—W. F. Kranze, Lee Loomis, Roy Tovey; Finance—P. D. Verrouse, W. J. Hall, W. F. Kranze; Fruit—W. J. Hall, Charles Kent, Fred Cole.

Furniture upholstering, cane splint and repairing; samples of all kinds; called for and delivered. Lytle, 304 Pine street, Fulton, N. Y. Tel 561-W-2.

FIRE AND POLICE COMMISSION.

Fire Chief Harry L. Waugh has submitted the following yearly report to the Fire and Police commission:

"During the year 1929 our department has received and responded to 114 fire alarms.

"In extinguishing the fires so reported, 25,500 feet of hose was hauled, 764 gallons of chemicals used and 650 feet of ladder used.

"The LaFrance truck No. 1 responded to 104 of these calls, the Seagrave No. 2 to 74 and the Brockway truck was used in various ways on 104 occasions.

"Insurances were carried on the building amounting to \$599,926.50. The amount of fire loss from the collection of these insurances was \$41,750, and losses amounting to \$1,158.36 were paid.

"The fire reported at the home of William Frigo, 209 North Fourth street, on June 6th, while small, was especially unfortunate, as Mrs. Frigo, who was blind, lost her life in the fire.

"The department has been free from accidents during the year and the apparatus has been placed in first class condition.

"Improvements have been made to our property by our men, greatly increasing its value and comfort to the men."

The improvements referred to by Chief Waugh in his report include the installation of new doors on the engine house, the repainting of the exterior of the building and the transferring of the battery room from the second floor to a fireproof constructed room in the basement. One of the greatest improvements is the completion of the new sleeping apartments, where a new room has been finished off.

The motor trucks have been equipped with new tires and the chief has been furnished with a new car. Several hundred feet of new hose are being purchased.

KRAUS MENTIONED FOR COACH.

Francis L. (Babe) Kraus, graduate manager at Hobart college, and his family, have returned to their home in Geneva, after being the guests of his parents, Mr. and Mrs. A. E. Kraus of 230 Cayuga street.

He was recently appointed graduate manager of athletics at Hobart by Dr. Murray Bartlett, president of the institution, to succeed George A. Roberts, who had served in that capacity since 1922.

Mr. Kraus received his degree at Hobart with the class of 1924 and during his under-graduate years was conspicuous in athletics, being a member of the varsity football, basketball and lacrosse teams for four years. Mr. Kraus is now being boomed for the head coaching position in football, to succeed Deak Welch, who resigned at the close of the last season. It is pointed out by those who favor his appointment that he will be able to handle his present positions and also that of football.

HIRAM LODGE.

The newly elected and appointed officers of Hiram Lodge of Masons were installed last evening as follows: Past master, E. A. Putnam; worshipful master, J. Lee Kittinger; senior warden, Harry E. Griffith; junior warden, A. T. Jennings; treasurer, A. M. Hurd; secretary, W. H. Hornbrook; trustee, Henry M. Holly; senior deacon, Harry S. Andrews; junior deacon, J. B. Chapman; senior master of ceremonies, Glenn Loomis; junior master of ceremonies, Harold Bailey; chaplain, Dr. Albert E. Legg; ther. D. S. Baldwin; pianist, Fred Pollard; marshal, Frank H. Rumsey.
