ARE DRUGS REALLY GOOD FOR YOU?
 There's no doubt that medication prescribed by health care professionals can help relieve many symptoms of many ailments. So why is there a trend AWAY from taking drugs?
 The answer is two words - **SIDE EFFECTS**. There is a growing awareness of potentially health-hazardous side effects associated with taking drugs. More and more health minded men and women are realizing that while drugs help relieve the symptoms, even the so-called "miracle drugs" may not get to the CAUSE of their ailments.
Chiropractic is natural health care. It is based on the belief that your body is a part of nature, and given the chance it can fight off affliction naturally and help heal itself naturally.
 Providing your ailment is chiropractic treatable, you do not run the risk of side effects of drugs, because with chiropractic **THERE ARE NO DRUGS**. And chiropractic treats many different health problems...from pain to backache, sciatica, headaches and much more. Truly chiropractic may be your natural alternative to taking drugs.
