

NYSLA Will Hold Annual Conference at SUNY Oswego

The New York State Latin Americanists (NYSLA) will hold their annual conference at SUNY Oswego, April 27-28. The topic for this year's meeting is "Latin American Migrants and Immigrants". Events will include a movie and a play, as well as panel discussions, open forums, scholarly papers and an audio-visual presentation.

All events for the conference will take place in the Formal Lounge of Hewitt Union.

On Friday, April 27, at 8 p.m., M. Kate Burke and Thomas W. Loughlin of SUNY Oswego's Theatre Department will appear in "Migrantes", a play based on the writings and experiences of Puerto Ricans on the mainland of United States.

Saturday's events get underway at 9:30 a.m., with a program of slides and texts on immigrant workers, presented by professors Stuart Voss and Ed Worthen of SUNY Plattsburgh. The presentation will be followed by a discussion of Latin American migrants in the United States by SUNY Oswego students. At 10:45 a.m., three recent immigrants to the U.S.—a student, an agricultural migrant worker, and a construction worker—will discuss their own experiences; and at 11:45 a.m., SUNY Fredonia's professor Osvaldo Chinchon and SUNY Oswego's professor, Elaine Dorough Johnson will talk about the formal literary expression of the immigrants' and migrants' experiences. The conference will end with the showing of "One Day in Bogota", a film about people who have moved from rural Colombia to the city.

Registration for the NYSLA Conference is \$5. For an additional \$10, a meal plan is available for participants. Students with valid ID cards will be admitted to the conference at no charge.

TRASH COMPACTORS

Question: With a household of six people, I feel a compactor could save a lot of work. But we don't need anything else in the house that will consume electricity. Just how much electricity will a compactor use?

TRASH COMPACTORS: A good refuge for refuse.

Answer: A compactor actually uses very little electricity. Whirlpool Corporation, who invented and first introduced the home trash compactor, advises that a compactor can be expected to use about 8 kilowatt hours a year, at a cost of about 30¢ to 40¢ per year.

Question: How much does a compacted bag of trash hold and how much does it weigh?

Answer: You can expect a compactor bag to hold about a week's trash for a family of four. It will weigh about 25 pounds.

MONEY SAVING TIP: One way to beat meat shrinkage is by roasting at lower temperatures. Oven temperatures of 300 degrees over a slightly longer time will cut weight losses on roasts with no loss on appearance or flavor.
