DAV MEETING
The Oswego Valley Chapter 106, DAV, will be holding their monthly meeting December 16, 1981, 7:30 p.m. at the Elks Lodge in Fulton, New York. All members are urged to attend.

Pointers for PARENTS
LEARNING IS FUN!

Through the ages parents have been trying to convince their children that learning is fun. Today, convincing children is easier and we can thank computers for making it so.

These scaled-down wonders of space-age technology are already an accepted part of the school scene in many places, but the latest innovation is the home com-

puter specifically designed for children.

Young computer users can learn that learning can be fun.

Wonder of wonders, children need no urging to work at learning their spelling and multiplication tables when they can do it with The Children's Discovery System computer, a fun learning device recently in-

roduced by Mattel Toys.

It's a product that makes the learning process both challenging and fun. Developed for children in the 6 to 11 age group. The Children's Discovery System computer works in conjunction with a variety of learning fun module activity cartridges which provide a selection of subjects including the language arts, math, art, music and arcade games. Additional subjects planned include history, science, geography, memory and logic, and nutrition.

The hero of the scene is "Cursor the Great," the personification of a computer cursor, who guides the child through the activity books that come with each learning fun module.

China generally means translucent earthenware. The Chinese made some of their finest from kaolin, a fine porcelain clay. Some English and French china is made of clay and powdered bone - bone china.
