MONUMENTAL DAGUERREOTYPE CASES.

A METHOD has long been sought for, to insert in a durable manner, Daguerreotype Likenesses to Head Stones and Monuments. I have been manufacturing these Cases for the last two years, and can warrant them to secure the picture for a long number of years.

The outside case is made of Parian Marble, and the box which encloses the picture and keeps it in a state of great preservation for a long number of years, is made of brass—a screw box. It makes a very neat job on a Head Stone or Monument. They are used in Greenwood Cemetery, Mount Auburn, Laurel Hill, and many other Cemeteries in the United States.

A liberal discount made to Marble Dealers and Daguerreotypists. Price from $2 25 each to $9 50.

A circular of engravings will be sent to any address, free, with price list.

It is highly respectable business, as I am article which is wanted in every family in the United States.

Enclose me two dollars by mail, at my risk, and I will forward by return mail a circular, with full instructions in the art. The business is very easy. Try it. If you are out of employment, and you will never regret it; for it will be better for you to pay the above sum, and insure a good business, than to pay twenty-five cents for a spurious advertisement.

This is no humbug. Try it! Try it!! Address your letters to

DWIGHT MONROE, New York.

I sent one of my Circulars to an Editor in Georgia, and he gave me a notice in his paper like the following:

"Mr. Monroe sent me one of his Circulars, and I will just say to my readers that whoever of you are out of employment, that Mr. Monroe's business is a good business, and money can be made out of it by any one who engages in it, for it is no humbug."

Deafness, difficulty of hearing even when the Drum is entirely gone. He will insert an artificial, answering nearly all the purposes of the natural.

He will operate on Club Feet, Tumorous Cancers, Morbid Growths, Deformities from Burns, Contracted Limbs, etc., etc.; perform the operation for Artificial Nose, by healing on a new one, and invert Artificial Eyes, giving them all the motion and expression of the natural, defying detection. They are inserted without removing the old one, or producing pain.

The superior advantages he has had in Europe and this country, for perfecting himself in all that is new and valuable to surgery, warrant him in saying that anything within the bounds of the profession may be expected from him.
