Detroiters See Hudson Tunnel

Party from Michigan City and Canada in Tour.

VENTILATION IS DEMONSTRATED

Features of Bollard Tube May Be Used in Border Project.

A group of businessmen, business men and prominent citizens of Detroit and Windsor, Canada, were taken through the tunnels of the Hudson Tunnel under the guidance of Mr. J. Meyer, chief engineer of the tunnel, who is also chief engineer of the tunnels in Michigan City, Indiana. The inspection was much appreciated by the visitors, who saw the large air intake openings on the Hudson Tunnel in Jersey City, and the long exhaust tunnels in New Jersey and New York.

The group entered the tunnel by van, which was turned into a long tunnel with the visitors, who were then taken into the tunnel by electric motors. On the way to the tunnel, at a distance of about a mile from where the van turned to the tunnel, the van was turned around and the visitors were taken into the tunnel, and then sent through the tunnel by electric motors.

This was the first time that such a group of visitors had been taken through the tunnels of the Hudson Tunnel in New York, and the visitors were greatly pleased with the demonstration of the ventilation system. They were shown the large air intake openings on the Hudson Tunnel in Jersey City, and the long exhaust tunnels in New Jersey and New York.

The visitors were also shown the ventilation system of the tunnel in New York, which is designed to assure a fresh air supply to the tunnel. The ventilation system is designed to assure a fresh air supply to the tunnel, and it is operated by electric motors. The visitors were also shown the ventilation system of the tunnel in New York, which is designed to assure a fresh air supply to the tunnel.

Among those forming the delegation were Mr. F. A. Uhlenhuth, Mayor John W. Johnson, of Windsor, Canada; Fred W. Coolidge, Mayor of White Plains, N. Y.; Mrs. C. B. Goodwin, wife of the late Mayor of White Plains; Mrs. H. W. Brown, wife of Mr. Brown, of Detroit; and Mrs. C. B. Goodwin, wife of the late Mayor of White Plains.

The visitors were also shown the ventilation system of the tunnel in New York, which is designed to assure a fresh air supply to the tunnel. The ventilation system is designed to assure a fresh air supply to the tunnel, and it is operated by electric motors. The visitors were also shown the ventilation system of the tunnel in New York, which is designed to assure a fresh air supply to the tunnel.
