**Economic Policy Held Flexible**

WASHINGTON (AP) - Sen. Harry S. Truman, chairman of the Senate Finance Committee, disclosed Tuesday that he is opposing any move to reduce the deficit construction of the Safeguard anti-ballistic missile system.

"It's premature to say what the Senate will do," he said, "but the case for further reductions in the budget should not be dismissed lightly." He added that the government was "taking a step in the right direction." He indicated that he was not opposed to the possibility of further cuts in defense spending.

"We must be ready to meet new challenges in the political, economic, and military fields," he said. "The world is changing, and our defense policy must be able to change with it." He added that the group would study the nation's defense needs on a long-term basis.
