STROLLING ALONG

Good news is always popular so — here it is. The little twint is due any day now. "Twins" and "triplets" are common enough these days, but four sets of twins are quite a rarity. "Family" with four sets of twins was recently born in the particular locality where you live. The news has been so widespread that there are now four sets of twins in the vicinity.

In the March monthly of the Woman's Home Missions League, a letter was published from the editor, Mrs. W. S. Foraker, of the Woman's Home Missionary Society, stating that she had received a letter from a woman who had given birth to four sets of twins. The letter was written by a woman who had been a member of the society for many years and had always been active in its work. She had recently moved to a new city and was in the process of settling in when she gave birth to four sets of twins. The woman was very happy and excited, and she wanted to share her news with the society.

The letter was published in the March monthly of the Woman's Home Missionary Society, and it was accompanied by a photograph of the four sets of twins. The society was very pleased with the news and published it in their monthly newsletter in order to share it with their members.

In the following issue of the newsletter, the society published a letter from a member who had given birth to triplets. The letter was written by a woman who had been a member of the society for many years and had always been active in its work. She had recently moved to a new city and was in the process of settling in when she gave birth to triplets. The woman was very happy and excited, and she wanted to share her news with the society.

The letter was published in the following issue of the newsletter, and it was accompanied by a photograph of the triplets. The society was very pleased with the news and published it in their newsletter in order to share it with their members.

The society continues to receive news of births of twins and triplets, and they are always happy to share this news with their members. They hope to continue to receive news of births of twins and triplets in the future.
