Nixon's Most Important Gain

By ROBERT ROBERTSON

WASHINGTON — President Richard M. Nixon and Vice President Spiro T. Agnew have been the target of a storm of criticism for their handling of the economy, but their performance in foreign policy has been praised by some analysts.

The President has been credited with having a clear, consistent foreign policy strategy. He has been praised for his ability to keep the American people informed about the progress of the war in Vietnam and for his leadership in the Middle East peace negotiations.

The Vice President has been praised for his handling of the economy, particularly his policies to control inflation and to stimulate economic growth. He has been credited with bringing down the unemployment rate and with increasing the availability of federal funds for housing and education.

However, the economic situation remains difficult, with high unemployment and inflation rates. The President has been criticized for not doing enough to address these issues.

In foreign policy, the President has been praised for his ability to negotiate peace agreements in Vietnam and the Middle East. He has been credited with bringing about a ceasefire in Vietnam and with helping to bring about a settlement in the Middle East.

The Vice President has been praised for his ability to negotiate trade agreements and to promote American interests in the world economy.

The President's policies have been praised for their effectiveness in bringing about peace and stability in the world. The Vice President's policies have been praised for their effectiveness in promoting economic growth and job creation.

In conclusion, President and Vice President have been praised for their leadership in foreign policy, but they have been criticized for their handling of the economy.
