THE MEMORIAL HOSPITAL

Work Must Be Commenced Early in the Spring

The activity of the Women's Auxiliary of the Solana and Solano Memorial Hospital of Yates County is certain to be a great example for the men. This Auxiliary has branches in all the towns of the county, and has made contributions toward an endowment fund for maternity cases.

The Board of Trustees is trying to place before the people of the county the financial situation which the Hospital Association must meet. The melancholy increase in the cost of labor and material since the hospital campaign was planned makes raising the money more imperative. How to bring this about, must be determined at once if the year 1920 is to see the completion of this great memorial in honor of our county's participants in the war.

Some people may say 'Let's take care of the sick and finished the hospital, and use as much of the money subscribed as may be necessary.'

Others say 'It was understood that two-thirds of the one hundred and fifty thousand dollars was to be set aside for an endowment, and any other money now be brought in.'

It is well understood that a hospital without a large endowment would be a constant source of worry. Hospitals are operated, and it is necessary that thousands of dollars be raised annually for the hospital, and the Memorial Hospital to Chasbestos has an annual deficit, which is paid by the founders of the institution.

It will be submitted for the sake of argument that the operation of the hospital will be less expensive than that of a city hospital, but we must also realize that its receipts would be correspondingly less.

For all that, it makes no difference what the thousand dollars are to be spent on, but it would be an advantage to have such an appropriation of ten thousand dollars for the memorial
